

Notice of Committee Meeting

Date: March 23, 2023

To: Irene Rodriguez
R.J. Passalacqua
Jason Fulton

From: Tracy Verrier, Executive Director

Re: Notice of Committee Meeting

The Geneva Industrial Development Agency's GEDC Committee will hold a Committee Meeting on Thursday, March 30, 2023 at 12:00pm. The meeting will be at the MRB Group office, 44 Castle Street, Geneva, NY. The meeting agenda is attached and available at <https://cityofgenevany.com/295/Industrial-Development-Agency-IDA>. The meeting will also be livestreamed on the IDA's YouTube Channel: <https://www.youtube.com/channel/UCVz4jDNtxuliy4SyugqQ8eg>.

Please confirm your attendance with Tracy Verrier, tracy.verrier@mrbgroup.com.

Re: Geneva IDA 122 North Genesee St. Geneva, NY

Thank you for the opportunity to assist with this roof assessment. Below you will find a summary of the areas we looked at along with the core cuts to understand roof construction, deficiencies and system suggestions.

122 North Genesee Street

Roof Area #1
Carlisle Roof installed in 2018
59,000 sq ft.
20 year warranty 72 mph wind speed
warranty

Concrete Deck
2 layers of 2.6" coated glass facer
adhered polyiso
Adhered .060 non-reinforced EPDM

Warranty expires 2038

Areas of concern were found on the perimeter of the building. Note the rotting wood & broken windows above that could be a significant source of water infiltration.

Drain baskets are missing in numerous locations. They should be replaced for maintenance purposes

Extensive masonry repair is needed in numerous locations.

Roof Area #2
Concrete Deck
2" Spray Foam
Coating

The coating is wearing off & there is granular loss.
This roof area should be addressed.
Numerous repairs are to coping are visible.

Roof Area #3
Wood Deck
2" Spray Foam
Coating

The coating is wearing off & there is granular loss.
This roof area should be addressed.

Masonry needs extensive repairs in numerous locations.

Tile camel back coping caps should be removed & replaced with wood blocking & metal coping edge system. The flashing on the camelback coping is failing.

Roof Area #4 end of
sawtooth
Wood Deck
4" Spray Foam
Smooth APP modified with
aluminized coating

Drainage should be
improved so debris doesn't
build up with tapered
insulation and/or added
drains

Aluminizer coating is
wearing off and no longer
protecting the membrane.
This roof area should be
addressed

Skylight is in poor
condition & should
be replaced

The skylights have been coated & covered as temporary fix.

The corrugated fiberglass panels have reached the end of their service life & should be replaced.

Masonry is in poor condition and is in need of extensive repair.

Shingle roof on wood deck in good condition.

Roof Area 5
Concrete deck
Granular modified
3" spray foam roof coated

Roof Area 6
Wood deck
Granular modified
3" spray foam
App Cap

Roof Area 7
Sloped Saw Tooth
Areas:
Sloped wood deck
1.5" BUR
Aluminizer coating

Valley Areas:
Wood Deck
1" Gravel BUR
.5" Wood Fiberboard
BUR
Aluminizer coating

Aluminizer coating is
wearing off and no
longer protecting the
membrane.
This roof area should
be addressed

The metal is not stripped in and could be a source for water to infiltrate the building.

Trees surrounding the roof areas should be trimmed to limit debris on the roof

The majority of the skylights in this roof area are covered with metal panels. In the picture below right the metal panels on the skylights are no longer there in one area.

Wall flashing is covered with roll roofing. It is an inexpensive fix with very little UV resistance.

Rusty screws and metal panels could be a source of water infiltration
Metal panels could be coated or removed and replaced.

The aluminized coating
is no longer protecting
the membrane from
UV.

Roof Area: 8
Concrete deck
Smooth APP
1" iso
EPDM

Installed in 2015

Roof Area: 9
Wood deck
2" gravel BUR
1" iso
Adhered EPDM
Installed in 2015

Chimney on roof
area 9 - Masonry
needs extensive
repair in numerous
areas

Numerous repairs
to flashing are
visible.

Roof Area: 10
Wood deck
2" gravel BUR
1"
Mechanically attached EPDM
Versico

Installed 2015

This roof area has significant
ponding water.

Significant ponding water
could cause issues if there is
a leak

Significant ponding water
could impact the structural
load

Numerous pavers were found
on roof area 10. There did not
appear to be any reason for
them.

Missing screws & significant rust were found in numerous locations and could be a source of water infiltration

The EPDM roof sections have been installed within last 10 years and are in good condition. When the time comes to replace roof area 10 drainage should be improved by installing tapered insulation and/or adding roof drains.

Roof area 8, 9 & 10 only have 1" of insulation which is approximately an R-5.7. The current code requires R-30. Insulation should be added when this roof redone.

Roof areas 2, 3, 4, 5 & 6 are spray foam roof systems & should be addressed as soon as possible. Roof area 7 should be addressed as soon as possible as it has reached the end of its service life.

Option for Spray Foam Roof areas only:

Silicone Roof coating over existing: Approximately \$10 sq ft

For all roof areas:

"Good" System Suggestion:

Wood & Concrete Deck Types:

Power wash the existing & adhere 115 mil Fleeceback EPDM with flexible fast adhesive installed directly over existing.

Warranty: 20 year 72 mph

Budget : \$15 sq ft

(115 mil Fleeceback EPDM could be mechanically fastened budget \$10 for wood deck areas and \$15 sq ft for concrete deck areas)

"Better" System Suggestion:

Wood & Concrete Deck Types:

Cut 3/4" holes 1 every 100 sq ft in existing system

Mechanically fasten new polyiso insulation to meet R-30 in conjunction with existing polyiso

Adhere .060 non-reinforced EPDM

Warranty: 20 year 72 mph

Wood deck Budget: \$20 sq ft

Concrete deck budget: \$22-\$23 sq ft

"Best" System Suggestions:

Completely tear off existing down to structural deck

Install mechanically fastened substrate board on wood deck

Install 725 vapor barrier on substrate or concrete deck

Adhere R-30 polyiso insulation with flexible fast adhesive 4" on center

Adhere 3/8" Securock cover board with flexible fast adhesive 4" on center

Fully adhered .060 non-reinforced EPDM

Warranty: 25 year 90 mph

Budget: \$30 sq ft

1.0 INTRODUCTION

Marks Engineering, P.C., (**Marks Engineering**) was retained by the Geneva Industrial Development Agency (the User) to perform a Phase I Environmental Site Assessment (ESA) for a property located at 122 N. Genesee Street, Geneva, New York (herein referred to as the “subject property”) (See **Figure 1**). The L shaped 6.7-acre subject property is currently occupied by the Geneva Enterprise Development Center (GEDC). The subject property was initially developed by the Empire State Can Company founded in the 1890's. The Empire State Can Company consolidated in 1901 with 123 other small American canaries to form the American Can Company. The factory continued to produce cans until 1913. During World War I (1914-1918) the factory produced shell casing for munitions. In 1923 the factory was converted to a machine shop that produced machinery for the canning industry. In 1925 the factory footprint significantly expanded and continued to do so through the 1930's. During World War II the factory once again supported the defense industry and designed and manufactured machinery to mass produce torpedoes. After the war, the factory continued to operate and grow through the 1950s and 1960s. In the 1970s and the 1980s production and employment started to decline due to changes in the technology, a weakening economy and changes in direction at the company, and the Geneva plant closure was announced in 1989. Since 1994 the Geneva Industrial Development Agency (IDA) has operated the subject property as a local business incubator known as the GEDC (Historic Geneva, 2022).

Today almost the entirety of the 6.7-acre subject property is covered with the footprint of the 200,000 square foot former manufacturing building. The building serves a variety of tenants that use the space for a mix of uses including, office space, storage and light manufacturing (See **Table 1**). The subject property is accessed from the west via N. Genesee St. and Avenue D. Parking spots and loading docks are present on the north side of the factory building adjacent to avenue D. An asphalt parking lot and loading docks are located at the rear of the building at the southeast corner of the subject property accessed from Hogarth Avenue. This southeast portion of the building is occupied by the City of Geneva Department of Public Works (DPW). A third entrance, accessed from Gates Avenue, is located on the north end of the L shaped property. This area of the building is occupied by Banner Doors of NY and includes a gravel access drive, grass cover and loading docks (See **Figure 2**).

1.1 Purpose

The purpose of this Phase I ESA was to identify *Recognized Environmental Conditions* associated with the current and historical usage of the subject property and adjoining land, nearby off-site sources of potential impact, and the potential environmental impact on the subject property from surrounding conditions or activities. The term *Recognized Environmental Condition* as defined by ASTM (E1527-21) means (1) *the presence of hazardous substances or petroleum products in, on or at the subject property due to a release to the environment*; (2) *the likely presence of hazardous substances or petroleum products in, on or at the subject property due to a release or likely release to the environment*; or (3) *the presence of hazardous substances or petroleum products in, on or at the subject property under conditions that pose a material threat of a future release to the environment*.

The term *Historic Recognized Environmental Condition* as defined by ASTM (E1527-21) is a *Recognized Environmental Condition* defined as a *previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities, without subjecting the property to any controls (for example activity and use limitations, or other property use limitations)*.

The term *Controlled Recognized Environmental Condition* as defined by ASTM (E1527-21) is a *Recognized Environmental Condition* affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of controls (for example, activity and use limitations or other property use limitations).

De minimis conditions are not *Recognized Environmental Conditions*. As defined by ASTM, a *de minimis condition* are those associated with a discharge that typically does not present a threat to human health or the environment and that, if brought to the attention of appropriate governmental agencies, would not be the subject of an enforcement action. Conditions determined to be *de minimis conditions* are neither *Recognized Environmental Conditions*, nor *Historic Recognized Environmental Conditions*, nor *Controlled Recognized Environmental Conditions*.

1.2 Scope of Work

The Phase I ESA was conducted in accordance with the American Standard for Testing and Materials (ASTM) Standard Practice E1527-21 for compliance with federal All Appropriate Inquiry (AAI) regulations in order to evaluate if the subject property presents any environmental liability to the Geneva IDA (the User) as the current “Owner” of the subject property. The ESA included completion of a regulatory environmental records and database search (including the ASTM minimum Standard Historic Resources as well as additional available Historic Sources), a site reconnaissance visit, interviews with persons familiar with the subject property and completion of the Phase I ESA Report.

1.3 Significant Assumptions

Evaluations and opinions presented in this report apply to the subject property conditions and features as they existed at the time of the assessment, and those reasonably foreseeable. They cannot necessarily apply to conditions and features which Marks Engineering is unaware and has not had the opportunity to evaluate.

Note that distances between the subject property and sites identified in the database search provided by Environmental Data Resources (EDR) are estimates. Most sites are identified by a single geographical location marker that may be the center of the site, the physical location of the mailing address, etc. Thus, site boundaries could extend significant distances from the geo-coded location of the site. Therefore, even though a site is not identified by EDR as being within the footprint of the subject property, adjacent to the subject property or within the search radius of the subject property, the site's boundaries could extend into or near the subject property boundary.

The following significant assumptions were used to formulate the recommendations and opinions contained in this report:

- Groundwater flow generally follows the topography
- Existing reports are accurate
- Interview comments are accurate
- Environmental database information is complete
- Conditions at the time of the site reconnaissance were representative of ordinary conditions at the subject property
- Location of property boundaries are accurate
- Geologic conditions are the same as shown on published maps, and
- Hydrogeologic conditions are the same as shown on published maps.

1.4 Limitations and Exceptions

The Phase 1 ESA was prepared in accordance with the Scope of Work described in Section 1.2. Any deviations from this practice are described in Section 6.0 of this report. The work conducted by Marks Engineering is limited to the services agreed to with the User and no other services beyond those explicitly stated should be inferred or implied.

The Phase I ESA was conducted in accordance with the American Standard for Testing and Materials Standard Practice E1527-21 Phase I ESA Standard to evaluate if any *recognized environmental conditions* currently exist on the subject property, with the following exceptions:

- There are no exceptions for this Phase I ESA.

The evaluations presented in this report are professional opinions from Marks Engineering based solely upon interpretations of the readily available historical information, conversations with persons knowledgeable about the subject property, and other readily available information, as referenced in this report. These evaluations are intended exclusively for the purpose stated herein, at the subject property indicated, and for the project indicated.

This study was not intended to be a definitive investigation of possible contamination at the subject property. The purpose and scope of this ESA was to determine if there is reason to suspect the possibility of contamination at the subject property. No exploratory borings, soil or groundwater sampling, laboratory analyses, or other intrusive/disruptive inspections were performed at the property and therefore, the conclusions set forth herein are made without the benefit of such investigations.

This report is intended to be used in its entirety. No excerpts may be taken to be representative of the findings of this assessment.

Marks Engineering cannot act as insurers and cannot "certify" that a subject property is free of environmental contamination. No expressed or implied representation or warranty is included or intended in this report, except that our services were performed within the limits prescribed by our client and with the customary thoroughness and competence of our profession.

1.5 Reliance

This report is intended for the sole use of the Geneva IDA (The User). The scope of services performed during this investigation may not be appropriate for others, and any use or re-use of this document, or the evaluations and opinions presented herein is at the sole risk of said User. The User is not required to verify independently the information provided within this report but may rely on information unless the User has actual knowledge that certain information is incorrect or unless it is obvious that certain information is incorrect based on other information obtained during the ESA process or otherwise actually known to the User.

2.0 SITE DESCRIPTION

2.1 Location and Legal Description

The subject property is located at 122 N. Genesee Street, Geneva, New York (See **Figure 1**). The 6.7-acre subject property is located in the City of Geneva, County of Ontario, New York and is identified as Tax Parcel 90.20-1-19 (See **Figure 2**). The subject property is L shaped and bounded to the north by Avenue D and Gates Avenue, to the south by a wooded earthen berm that served as a former rail bed (tracks are no longer present), to the east by a railroad track and a vacant metal clad commercial/storage building (51 Central Avenue) and to the west by N. Genesee Street and residential properties (See aerial photography provided in **Exhibit A**).

2.2 Current Property Use and Improvements

The 6.7-acre subject property is located in a commercial setting surrounded by a residential neighborhood and is currently occupied by the Geneva GEDC. Since 1994 the Geneva IDA has operated the subject property as a local business incubator known as the GEDC. Today almost the entirety of the 6.7-acre subject property is covered with the footprint of the 200,000 square foot former manufacturing building. The building serves a variety of tenants that use the space for a mix of uses including, office space, storage and light manufacturing (See **Table 1**). The subject property is accessed from the west via N. Genesee St. and Avenue D. Parking spots and loading docks are present on the north side of the factory building adjacent to avenue D. An asphalt parking lot and loading docks are located at the rear of the building at the southeast corner of the subject property accessed from Hogarth Avenue. This southeast portion of the building is occupied by the City of Geneva DPW. A third entrance, accessed from Gates Avenue, is located on the north end of the L shaped property. This area of the building is occupied by Banner Doors of NY and includes a gravel access drive, grass cover and loading docks (See **Figure 2**).

The current Owner of the subject property is the City of Geneva IDA with an address of 47 Castle Street, Geneva, NY. The subject property is currently operated by the GEDC, a local business incubator that operates the site to repurpose the former industrial complex and promote its repurposed use for manufacturing, service providers, non-profits, arts & crafts, performing arts, office use, technology companies, and more. The GEDC leases the property to a variety of tenants as described in **Table 1** and Section 3.4.

The present-day building consists of multiple phases of build out and expansion. The original factory occupied the southeast corner of the property and was constructed in the late 19th century. The original factory structures were demolished enabling the large expansion of the building to the west side of the subject property (towards N. Genesee St.) starting in the 1920s and continuing in the 1930s and 1940's. A significant expansion in the 1950s again increased the footprint of the building and occupied the portion of the property to the north of the initial 19th century factory structures. All of the buildings today are interconnected internally and form one large L shaped structure. Current floorplans are provided as **Appendix A**.

2.3 Adjoining Properties

A general description of the immediately surrounding properties is provided below:

- **North:** Nardoizzi Paving and Construction, The Center of Concern food pantry, The Cracker Factory event space, and Univar Solutions described as a chemical blending and distributor for the food industry
- **South:** a wooded elevated earthen berm that formerly served as a rail bed
- **East:** a rail line and a vacant metal clad commercial/storage building
- **West:** N. Genesee St., and residential properties

2.4 Topography

The subject property has a flat gradient that gently slopes to the east/northeast to an unnamed tributary (See **Exhibit B**). According to the topographic mapping (**Exhibit B**) and the EDR Radius Report (**Exhibit C**), the property elevation is approximately 476 feet above mean sea level.

2.5 Geological Setting

Geology

The subject property is underlain by a Paleozoic era, Middle Devonian period stratigraphic sequence. Overburden soils are characterized as fine-grained silty loam in the first foot below grade underlain by a silty clay with slow infiltration rate.

Hydrogeology

No existing groundwater flow data exists for the subject property. It is expected that local groundwater will follow the gentle sloping surface topography and flow to the east/northeast towards a series of unnamed tributaries that discharge to the south to Seneca Lake.

2.6 Floodplain

According to the EDR Overview Map, which is based on the Federal Emergency Management Agency Flood Maps, the subject property is not within any mapped flood zone.

2.7 Utilities

Electric - The subject property is served by New York State Electric & Gas (NYSEG). A variety of transformers and electric subpanels were observed throughout the subject property. Given the age of the facility the presence of PCBs and mercury switches related to older transformers and switching devices is not ruled out.

Gas – Natural Gas is provided to the subject property by NYSEG. The building is not served by a central HVAC system. Large natural gas boilers in the basement of Building A, gas hot water heaters (tank style) and a number of overhead gas space heaters were observed in the various sections and subdivided spaces of the building.

Water – Potable water to the subject property is provided via the municipal water supply provided by the Town of Geneva Water and Sewer Department. The City of Geneva receives its water supply from Seneca Lake. A water meter was not observed during the site reconnaissance.

Sewer/Septic – Municipal sanitary sewer services are provided to the subject property by the Town of Geneva Water and Sewer Department. Various sewer connections, piping and cleanouts were observed throughout the subject property. No historic or present-day septic system is reported at the subject property.

2.8 Specialized Knowledge or Experience

ASTM E1527-21 indicates that if the User is aware of any specialized knowledge or experience that is material to potential environmental concerns in connection with the property, the User must communicate that information to the preparer.

- The User has not informed Marks Engineering of any specialized knowledge or experience in connection with this property.

3.0 RECORDS REVIEW

3.1 Standard Record Sources

Regulatory database information was obtained through EDR (**Exhibit C**). The EDR report is a listing of sites identified on select federal and state standard source environmental databases within the search distance specified by ASTM E1527-21. These select federal and state environmental databases are described in more detail within the EDR report.

The following table lists the ASTM-required databases with their corresponding ASTM-required search radii. The databases are indicated in which the target site and/or surrounding sites (within the ASTM-required search radii) were identified. For this Environmental Site Assessment, the subject property and surrounding sites were identified in the following databases in the EDR report:

Database Reviewed	Target Site	Search Radius	Surrounding Sites
National Priorities List (NPL)	No	1 Mile	0
National Priorities List Deletions (Delisted NPL)	No	1 Mile	0
Federal Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS)	No	1/2 Mile	0
Federal CERCLIS—No Further Remedial Action Planned (CERCLIS – NFRAP)	No	1/2 Mile	1
Federal Corrective Action Tracking System (CORRACTS)	No	1 Mile	0
Federal Resources Conservation and Recovery Act Information Treatment, Storage, and Disposal Facilities	No	1/2 Mile	0
RCRA Generators (RCRA-LQG, RCRA-SQG, RCRA-CESQG)	1	1/4 Mile	5
Federal Engineering Control Sites (US ENG Controls)	No	1/2 Mile	0
Federal Institutional Control Sites (US INST Control)	No	1/2 Mile	0
Federal Emergency Responses Notification System (ERNS) List	No	subject property	-
State Hazardous Waste Sites (SHWS)	No	1 Mile	1
State Solid Waste Facilities or Landfills and Historic Landfills Sites	No	1/2 Mile	5
State Leaking Storage Tanks List (LTANKS)	No	1/2 Mile	8
Historic Leaking Storage Tanks (HIST LTANKS)	No	1/2 Mile	0
State Underground Storage Tanks (UST)	No	1/4 Mile	5
State Chemical Bulk Storage (CBS)	No	1/4 Mile	2
State Aboveground Storage Tanks (AST)	1	1/4 Mile	4
State Chemical Bulk Storage AST (CBS AST)	No	1/4 Mile	1
State TANKS	No	1/4 Mile	1
State Institutional/Engineering Control Sites	No	1/2 Mile	5
State Voluntary Cleanup Program Sites (VCP)	No	1/2 Mile	1
State Brownfields/ERP	No	1/2 Mile	3
Landfills/Solid Waste Disposal Sites	No	1/2 Mile	0
Hazardous Waste/Contaminated Sites	No	1 Mile	0

State Spills (NY Spills)	1	1/8 Mile	8
RCRA NonGen/NLR	No	1/4 Mile	6
Formerly Used Defense Sites (FUDS)	No	1 Mile	1
Facility Index System (FINDS)	1	1 Mile	0
Enforcement and Compliance History Info (ECHO)	1	1 Mile	0
PFAS ECHO	No	1/4 Mile	1
Manifest	No	1/4 Mile	12
EDR Historic Auto	No	1/8 Mile	1

Marks Engineering evaluated the following with respect to the identified surrounding sites:

- Case status (e.g., whether a No Further Action (NFA) letter has been issued or a case has been closed);
- Type of database and whether the presence of soil or groundwater contamination is known;
- Distance of the site from the subject property; and,
- Whether the site is up- or down-gradient of the subject property based on local topography and the anticipated regional groundwater flow direction.

Marks Engineering reviewed the information provided using the above-criteria and the findings are discussed below.

3.1.1 Federal Databases

NPL

The NPL database identifies sites designated for priority cleanup under the USEPA Superfund Program. The EDR report identified no NPL sites within a 1-mile radius of the subject property.

Delisted NPL

The Delisted NPL database identifies sites previously listed on the NPL where the USEPA determine that an NFA for the site is warranted. The EDR report did not identify any delisted NPL sites within a 1-mile radius of the subject property.

CERCLIS

The CERCLIS database contains information on abandoned, inactive, or uncontrolled hazardous waste sites, which may require cleanup under CERCLA. The EDR report did not identify any CERCLIS sites within a 0.5-mile radius of the subject property.

CERCLIS-NFRAP

The CERCLIS-NFRAP database contains information on hazardous waste sites which have a status of “no further remedial action planned.” The EDR report identified one CERCLIS-NFRAP sites within a 0.5-mile radius of the subject property.

1. The Hicks Site, located at 185 N. Genesee St. approximately 0.16 miles northwest of the subject property, is on the Superfund Enterprise Management System (SEMS) database.

Marks Engineering does not expect the above site to impact the subject property on the basis of the sites presence on the no further remedial action planned SEMS database.

CORRACTS

The CORRACTS database is a list of hazardous waste handlers with RCRA Corrective Action Activity. The EDR report did not identify CORRACTS sites located within a 1-mile radius of the subject property.

RCRA Treat, Store, or Dispose (TSD) Facilities

The RCRA TSD database includes selected information on sites that TSD of hazardous wastes as defined by the Resource Conservation and Recovery Act (RCRA). The EDR report did not identify RCRA TSD sites within approximately 0.5 miles of the subject property.

RCRA Generators

Marks Engineering reviewed the RCRA generators list of sites, which have filed notification of hazardous waste generation (i.e., generators) with the USEPA in accordance with RCRA requirements. Hazardous waste generators are classified by the amount of hazardous waste generated in a calendar month into the following categories: Large Quantity Generator (LQG), greater than 1,000 kilograms (kg); Small Quantity Generator (SQG), 100 to 1,000 kg; and Conditionally Exempt Small Quantity Generator (CESQG), less than 100 kg. The subject property was identified as a historic RCRA generator. In addition, five RCRA historic generators were identified within 0.25 miles of the subject property:

1. E-Waste systems, located at 122 N Genesee Street on the subject property, is listed as a CESQG.
2. Univar Solutions, located at 61 Gates Avenue approximately 100 feet north of the subject property, is listed as a CESQG.
3. Dollar General, located at 194 N Exchange Street approximately 0.2 miles northeast of the subject property, is listed as a CESQG.
4. Bastian Co., located at 1 American Center approximately 0.175 miles west of the subject property, is listed as a SQG.
5. CCN International, located at 200 Lehigh Avenue approximately 0.146 miles north of the subject property, is listed as a LQG.
6. Sunoco, located at 1 Exchange Street approximately 0.243 miles south/southeast of the subject property, is listed as a LQG.

Marks Engineering does not expect any the above six sites to impact the subject property on the basis of the sites RCRA generator status.

Federal Engineering Control Sites

The Federal Engineering Control database is a listing of sites with engineering controls in place which include various types of caps, building foundations, liners and treatment methods to create pathway elimination for regulated substances to enter environmental media or affect human health. No sites were identified within the 0.5-mile search radius.

Federal Institutional Control Sites

The Federal Institutional Control database is a listing of sites with institutional controls in place including groundwater restrictions, property use restrictions and post remediation care requirements intended to be protective of public health and the environment. No sites were identified within the 0.5-mile search radius.

Federal Emergency Responses Notification System List (ERNS)

ERNS records and stores information on reported releases of oil and hazardous substances. No ERNS list sites were identified on the subject property.

3.1.2 New York Databases

State Hazardous Waste Sites (SHWS)

The database search identified one SHWS sites within the ASTM-recommended search radius of 1-mile:

1. The former Geneva Foundry Site, located at 23 Jackson Street at a distance of approximately 0.463 miles south of the subject property, was a former foundry facility with documented release of metals to on-site soil as well as depositional impacts of particulate matter to surface soils off-site in the surrounding neighborhood. The site is enrolled in the Brownfield Cleanup Program (BCP) and currently being remediated.

Marks Engineering does not expect the above site to impact the subject property. The site is undergoing active remediation though the BCP under the supervision of the NYSDEC and the subject property is outside the identified zone of influence of

off-site metals deposition related to historic air emissions from the foundry. The site is almost ½ mile distance in a perceived hydraulically downgradient direction from the subject property.

State Solid Waste Facilities/Landfill

The State Solid Waste Facilities/Landfill (SWF/LF) database contains an inventory of solid waste disposal facilities or landfills in New York. Five SWF/LF sites are identified within the ASTM recommended search radius of 0.5-miles:

1. Marsh Creek Digester is located at 45 Doran Avenue at a distance of approximately 0.425 miles from the subject property. The facility is identified as a compositing and biosolids digester.
2. Geneva C&D, located at 41 Doran Avenue at a distance of approximately 0.427 miles from the subject property, is identified in the database. No additional information is provided about this site in the EDR report other than its inclusion in the database; however, based on the listings name it is assumed to function as a C&D landfill and/or transfer station.
3. Geneva Trenches, also located at 41 Doran Avenue at a distance of approximately 0.427 miles from the subject property, is identified in the database. The database indicates the facility manages source separated organic waste (SSOW); leaves.
4. Geneva Transfer Station and Composting, located at 71 Doran Avenue at a distance of approximately 0.431 miles from the subject property, is identified in the database. The database indicates the facility composts and manages biosolids.
5. Geneva DPW C&D Processing, located at 46 Doran Avenue at a distance of 0.488 miles from the subject property, is identified in the database. The database indicates the facility manages wood, brush branches trees and stumps.

Marks Engineering does not expect any of the above five sites to impact the subject property, due to the distance from the subject property and the nature of the information provided in the listings.

State Leaking Storage Tanks

The Leaking Storage Tank (LTANKS) database contains a listing of leaking storage tanks cases. The EDR report identified eight LTANKS sites within the ASTM-recommended search radius of 0.5-miles of the subject property.

1. Dave's Service Station, located at the intersection of North and Exchange Streets at a distance of approximately 0.214 miles south/southeast of the subject property, is identified in the NYSDEC LTANKS database and is recorded having a tank test failure in 1988. The tank was vented and retested and passed.
2. Atlantic Service Station, located at the intersection of North and Exchange Streets at a distance of approximately 0.231 miles south/southeast of the subject property, is identified in the NYSDEC LTANKS database and is recorded having a tank test failure in 1992. A spill file was later opened, and some contaminated soil removed in 1995 and a soil venting system installed.
3. Dave's Service Station, located at the intersection of North and Exchange Streets at a distance of approximately 0.214 miles south/southeast of the subject property, has a second listing in the NYSDEC LTANKS database and is recorded having a tanks test failure in 1990. A spill file was opened and contaminated soil removed as well as installation of product recover wells. A no further action letter was issued by the NYSDEC spills unit in 2020.
4. A+ Mini Mart, located at 14 Exchange and North Street at a distance of approximately 0.267 miles from the subject property, is identified in the NYSDEC LTANKS database and is recorded having a spill opened in 1988 during tank removal. Product was identified and contaminated soil encountered and removed. A liquid and vapor recovery system was installed. A no further action letter was issued by the NYSDEC spills unit in 2017.
5. ARG Trucking Joes Auto, with an unlisted address located approximately 0.320 miles southeast of the subject property, is identified in the NYSDEC LTANKS database and is recorded as having a surface release to pavement in 1993 that was cleaned up with spill pads. The DEC record indicated no further action needed.
6. Joes Auto Parts & Station, located at 52 East North Street approximately 0.323 miles southeast of the subject property, is identified in the NYSDEC LTANKS database and is recorded as having a tank overfill in 2001. The Geneva Fire Department responded and cleaned up the spill with granular absorbent and spill pads. The DEC record indicated no further action needed.

7. MAIO (SAM) reported the presence of underground tanks at a property located at 289 Lyons Road (Route 14) approximately 0.451 miles from the subject property. According to the LTANKS database five underground tanks were identified and removed in 1986. The spill record was closed in 1987.
8. The former Geneva Foundry Site, located at 23 Jackson Street at a distance of approximately 0.463 miles south of the subject property, is identified in the NYSDEC LTANKS database. A leak in a UST was reported in 1983 and the tank and contaminated soil was removed.

Marks Engineering does not expect any the above eight sites to impact the subject property on the basis of the sites LTANKS status and the nature of the information provided in the listings. All of the listed sites are located at a lower elevation in a perceived hydraulically downgradient direction in comparison to the subject property. In addition, the closest of the sites is $\frac{1}{4}$ mile from the subject property.

Historic Leaking Storage Tanks

The Historic Leaking Storage Tank (HIST LTANKS) database contains a listing of LTANKS cases which have been granted the status an NFA. The EDR report did not identify any HIST LTANKS sites within the ASTM-recommended search radius of 0.5-miles.

State Underground Storage Tanks

The Underground Storage Tank (UST) database contains registered USTs. Five UST sites are identified within the recommended $\frac{1}{4}$ -mile radius of the subject property:

1. Toner Paving Company, located at 124 N Genesee Street at a distance of approximately 100-feet west/northwest of the subject property, has a historic record of a 5,000-gallon gasoline UST and a 2,0000-gallon gasoline UST that were both closed via removal in 1993. No associated spills or releases were identified in the EDR report for these two tanks. There are no records of current USTs at this property.
2. Market Basket, located at an unspecified address on Gates Avenue at a distance of approximately 0.141 miles east/northeast of the subject property, has a historic record of three USTs including an 8,000-gallon gasoline, a 500-gallon UST and a 295-gallon UST both with unidentified contents that were closed via removal in 1999 and 1998. No associated spills or releases were identified in the EDR report for these three tanks. There are no records of current USTs at this property.
3. Leona W Choffin, located at 379 North Genesee Street at a distance of approximately 0.209 miles north/northwest of the subject property, has a historic record of one 500-gallon UST with unidentified contents that was closed via removal in 1995. No associated spills or releases were identified in the EDR report for this tank. There are no records of current USTs at this property.
4. Speedway, located at 203 Lyons Road at a distance of approximately 0.238 miles north/northeast of the subject property, has a historic record of three USTs including two 6,000-gallon gasoline USTs and a 10,000-gallon gasoline UST that were closed via removal in 1994. Five USTs including a 10,000-gallon gasoline, 6,000-gallon gasoline, 4,000-gallon gasoline, 5,000-gallon diesel and 3,000-gallon kerosene were installed in 1994 and remain in service at the property. No associated spills or releases were identified in the EDR report for any of the tanks at this property.
5. Dave's Service Center, located at 1 North Exchange Street at a distance of approximately 0.243 miles north/northeast of the subject property has a historic record of four USTs including three 4,000-gallon gasoline USTs closed via removed in 1988 and a 1,000-gallon UST with unidentified contents that was closed via removal in 2013. No associated spills or releases were identified in the EDR report for these four tanks. There are no records of current USTs at this property.

Marks Engineering does not expect any the above five sites to impact the subject property on the basis of the sites UST status based on the distance from the subject property and the absence of any associated spills or releases. The records indicate that all of the identified USTs were removed in the late 80's and mid-1990s. Only one of the remaining identified listings, Speedway gas station, has current active in-service USTs. This gas station is located approximately $\frac{1}{4}$ mile from the subject property.

State Chemical Bulk Storage

The Chemical Bulk Storage (CBS) database contains registered CBS facilities. Two CBS facilities are identified within the recommended $\frac{1}{4}$ -mile radius of the subject property:

1. Univar Solutions, located at 61 Gates Avenue at a distance of approximately 100-feet north/northeast of the subject property, is an active registered CBS facility. No additional pertinent information was provided in the EDR report regarding the facilities CBS listing.
2. Display Technologies Inc., located at 35 Lehigh Street at a distance of approximately 275-feet north/northwest of the subject property, is a formerly registered CBS facility. The registration is closed. No additional pertinent information was provided in the EDR report regarding the facilities CBS listing.

Marks Engineering does not expect any the above two sites to impact the subject property on the basis of the sites CBS status.

State Aboveground Storage Tanks

The Aboveground Storage Tank (AST) database contains registered ASTs. The subject property is identified as an AST site. In addition, four AST sites are identified within the recommended $\frac{1}{4}$ -mile radius of the subject property:

1. The City of Geneva Public Works Facility, located at the southeast corner of the subject property has six registered petroleum bulk storage (PBS) ASTs at the property including a 5,000-gallon gasoline tank installed in 1998, a 3,000-gallon diesel installed in 1998, a 300-gallon diesel tank installed in 1998, two 160-gallon lube oil tanks installed in 2006, and a 160-gallon hydraulic oil tank installed in 2006. All tanks have associated fuel islands or dispensers for on-site use.

Although there are no reported non-compliance issues associated with the six ASTs located on the subject property, the number of years the tanks have been present and in service and the associated 25 years of filling these tanks and dispensing the petroleum contents of the tanks presents a **Recognized Environmental Condition**; as in all likelihood during that time incidental spills may have occurred which would result in a likely release to the environment at the subject property.

2. Toner Paving Company, located at 124 N. Genesee Street at a distance of approximately 100-feet north/northwest of the subject property, has a historic record of three ASTs including a 250-gallon kerosene tank removed in 2001, a 2,000-gallon gasoline tank removed in 2008 and a 1,000-gallon diesel tank removed in 2001. Two ASTs, including two 500-gallon diesel tanks installed in 2001 remain in service at the property. No associated spills or releases were identified in the EDR report for any of the tanks at this property.
3. Display Technologies Inc., located at 35 Lehigh Street at a distance of approximately 275-feet north/northwest of the subject property, has a historic record of a closed 3,000-gallon fiberglass AST with unidentified contents. No additional pertinent information was provided in the EDR report regarding the facilities AST listing. No associated spills or releases were identified in the EDR report for the tank located at this property.
4. Four Star Transport Inc., located at 211 Lyons Road has a historic record of two ASTs at the property including a 5,000-gallon diesel tank closed in 1992 and a 500-gallon #2 fuel oil tank closed in 1992. No associated spills or releases were identified in the EDR report for any of the tanks at this property.
5. Four Star Trucking., located at 211 Lyons Road has a historic record of two ASTs at the property including a 5,000-gallon diesel tank closed in 1995 and a 500-gallon #2 fuel oil tank that is listed as remains in service. No associated spills or releases were identified in the EDR report for any of the tanks at this property.

Marks Engineering does not expect the above four sites to impact the subject property on the basis of the sites AST status as there are no non-compliance issues reported regarding the ASTs. Storage amounts and use are minimal and/or the distance of the sites from the subject property.

State Chemical Bulk Storage Aboveground Storage Tanks

The Chemical Bulk Storage Aboveground Storage Tank (CBS AST) database contains a listing of facilities that store regulated hazardous substances in aboveground tanks. The EDR report identified one CBS AST site within the recommended $\frac{1}{4}$ -mile radius of the subject property.

1. Display Technologies Inc., located at 35 Lehigh Street at a distance of approximately 275-feet north/northwest of the subject property, has a record from 1993 of a closed 3,000-gallon AST that contained cupric chloride. No additional pertinent information was provided in the EDR report regarding the facilities CBS AST listing.

Marks Engineering does not expect any the above site to impact the subject property on the basis of the sites CBS AST status.

State TANKS

The TANKS database contains records of facilities that are or have been regulated under a Bulk Storage Program. The EDR report identified one TANKS site within the recommended $\frac{1}{4}$ -mile radius of the subject property.

1. New York Telephone (NYNEX), located at 190 Lyons Road at a distance of approximately 0.188-miles northeast of the subject property, has a record of an active PBS registration in the TANKS database. No additional pertinent information was provided in the EDR report regarding the facilities TANKS listing.

Marks Engineering does not expect the above site to impact the subject property on the basis of the sites TANKS status.

State Engineering (ENG) Controls

The NY ENG Controls database contains an inventory of sites that have a Declaration of Environmental Restriction or a Deed Notice for soil contamination.

Two sites were identified in the ENG Controls database within the ASTM recommended search radius of 0.5-miles:

1. The Former H.B. Fuller Monarch Div. Property, located at 61 Gates Avenue at a distance of approximately 100-feet north/northeast of the subject property, has an active listing in the ENG Controls database. A boiler and circuit board manufacturer operated the facility until it was purchased in 1979 by Monarch Chemical (Monarch), a former operating division of H.B. Fuller Company. Monarch used the facility to manufacture food grade cleaners/sanitizers used in the dairy and related industries. H.B. Fuller Company sold the property and the business in 1996. Univar, Inc. is the current owner/operator of the site. Univar blends and distributes chemicals for the food industry. H.B. Fuller Company conducted several environmental assessments of the site as part of the 1996 property sale. The results identified contamination from volatile organic compounds, including tetrachloroethene and associated degradation products. Based on this information, H.B. Fuller Company submitted an application in 2001 to enter into New York State's Voluntary Cleanup Program (VCP). The depth to groundwater ranges from approximately three to 13 feet below the ground surface. Groundwater generally flows eastward. Remedial actions are complete, and measures are in place to control the potential for coming in contact with residual contamination remaining at the site. Site management activities include a deed restriction, maintenance of the existing soil cover, and a groundwater and soil vapor intrusion monitoring program.

The above site borders the subject property to the north. The Remedial Action at the site is complete and the site operates under a Site Management Plan with Institutional and Engineering Controls in place to manage the remaining residual contamination at the site. Given these conditions, the Former H.B. Fuller Monarch NYSDEC VCP Site is considered a ***Controlled Recognized Environmental Condition***.

2. The former Geneva Foundry Site, located at 23 Jackson Street at a distance of approximately 0.463 miles south of the subject property, was a former foundry facility with documented release of metals to on-site soil as well as depositional impacts of particulate matter to surface soils off-site in the surrounding neighborhood. The site is enrolled in the Brownfield Cleanup Program (BCP) and currently being remediated. Prior to remediation, the primary contaminants of concern were heavy metals and polycyclic aromatic hydrocarbons (PAH's) in soil. Remaining contamination in the soil is being managed under a Site Management Plan. Measures are in place to control the potential for coming in contact with subsurface soil and groundwater contamination remaining on the site. Contaminated groundwater at the site is not used for drinking or other purposes and the site is served by a public water supply that obtains water from a different source not affected by this contamination.

Marks Engineering does not expect the above site to impact the subject property on the basis of the sites Engineering Controls status. The site is undergoing active remediation though the BCP under the supervision of the NYSDEC and the subject property is outside the identified zone of influence of off-site metals deposition related to historic air emissions from the foundry. The site is almost $\frac{1}{2}$ mile distance in a perceived hydraulically downgradient direction from the subject property.

State Institutional (INST) Controls

The New York INST Control database contains an inventory of sites that have institutional controls, such as restrictions on groundwater use, construction, and property use, in place.

Three sites were identified in the INST Controls database within the ASTM recommended search radius of 0.5-miles:

1. The Former H.B. Fuller Monarch Div. Property, located at 61 Gates Avenue at a distance of approximately 100-feet north/northeast of the subject property, has an active listing in the INST Controls database.

The site is described in detail in the ENG Controls section above and is considered a **Controlled Recognized Environmental Condition** on the basis of its proximity to the subject property and its former enrollment in the NYSDEC VCP.

2. The former Geneva Foundry site, located at 23 Jackson Street at a distance of approximately 0.463 miles south of the subject property, has an active listing in the INST Controls database and is discussed in detail in the ENG section above.

Marks Engineering does not expect the above site to impact the subject property on the basis of the sites INST Controls status. The site is undergoing active remediation through the BCP under the supervision of the NYSDEC and the subject property is outside the identified zone of influence of off-site metals deposition related to historic air emissions from the foundry. The site is almost ½ mile distance in a perceived hydraulically downgradient direction from the subject property.

3. The former Market Basket site, located at the corner of Gates Avenue and Lehigh Street at a distance of approximately 0.064 miles north/northwest of the subject property, has an active listing in the INST Controls database. The Site has had various uses since 1900 to 1986. The uses at the Site included the Geneva Cutlery Company, Stearns Nursery, Inc., the Market Basket Corporation, general warehouse space, tool rentals and paint booth rental for do-it-yourself auto body repair. Exceedances of soil cleanup objectives include petroleum compounds, metals, and chlorobenzenes. Exceedances of the groundwater standards and guidance values included petroleum compounds, chlorinated solvent compounds, and chlorobenzenes. The depth to groundwater at the site ranges from 5 to 10 feet below the ground surface. The groundwater flow is in an easterly southeastern direction. The site was enrolled in the NYSDEC Environmental Restoration Program (ERP) and remediation at the Site is complete. Remedial actions have achieved soil cleanup objectives for commercial use. Residual contamination in the soil and groundwater at the Site will be managed under the Site Management Plan.

The above site borders the subject property to the northwest. The Remedial Action at the site is complete and the site operates under a Site Management Plan with Institutional Controls in place to manage the remaining residual contamination at the site. Given these conditions, the Former Market Basket NYSDEC ERP Site is considered a **Controlled Recognized Environmental Condition**.

Voluntary Cleanup Program (VCP)

The New York VCP database contains a list of sites where responsible parties have entered into an agreement to remediate contaminated sites. One VCP sites were identified within the ½-mile search radius of the subject property:

1. The Former H.B. Fuller Monarch Div. Property, located at 61 Gates Avenue at a distance of approximately 100-feet north/northeast of the subject property, is listed in the VCP database. H.B. Fuller Company sold the property and the business in 1996. Univar, Inc. is the current owner/operator of the site. Univar blends and distributes chemicals for the food industry. H.B. Fuller Company conducted several environmental assessments of the site as part of the 1996 property sale. The results identified contamination from volatile organic compounds, including tetrachloroethene and associated degradation products. Based on this information, H.B. Fuller Company submitted an application in 2001 to enter into New York State's Voluntary Cleanup Program. Additional description of the site is provided above in the ENG Controls section.

The above site borders the subject property to the north. The Remedial Action at the site is complete and the site operates under a Site Management Plan with Institutional and Engineering Controls in place to manage the remaining residual contamination at the site. Given these conditions, the Former H.B. Fuller Monarch NYSDEC VCP Site is considered a **Controlled Recognized Environmental Condition**.

Brownfields/ERP

The New York Brownfields database contains a list of former or current commercial or industrial sites that are vacant or underutilized on which there is suspected to have been a release leading to contamination of soil and/or groundwater. Three New York Brownfields/ERP sites were identified within the ½-mile search radius:

1. The former Geneva Foundry Site, located at 23 Jackson Street at a distance of approximately 0.463 miles south of the subject property, was a former foundry facility with documented release of metals to on-site soil as well as depositional impacts of particulate matter to surface soils off-site in the surrounding neighborhood. The site is enrolled in the BCP and

currently being remediated. Prior to remediation, the primary contaminants of concern were heavy metals and PAH's in soil.

2. The former Geneva Foundry Site, located at 23 Jackson Street at a distance of approximately 0.463 miles south of the subject property, is also enrolled in the ERP program.

Marks Engineering does not expect any the above site to impact the subject property on the basis of the sites Brownfield/ERP status. The site is undergoing active remediation though the BCP under the supervision of the NYSDEC and the subject property is outside the identified zone of influence of off-site metals deposition related to historic air emissions from the foundry. The site is almost ½ mile distance in a perceived hydraulically downgradient direction from the subject property.

3. The former Market Basket site, located at the corner of Gates Avenue and Lehigh Street at a distance of approximately 0.064 miles north/northwest of the subject property, has an active listing in the ERP database. The site was enrolled in the ERP and remediation at the Site is complete. Remedial actions have achieved soil cleanup objectives for commercial use. Residual contamination in the soil and groundwater at the Site will be managed under a Site Management Plan.

The above site borders the subject property to the northwest. The Remedial Action at the site is complete and the site operates under a Site Management Plan with Institutional Controls in place to manage the remaining residual contamination at the site. Given these conditions, the Former Market Basket NYSDEC ERP Site is considered a **Controlled Recognized Environmental Condition**.

SPILLS

The NYSDEC Spill Incident database contains records of surface, groundwater, and hazardous material spills. The subject property is identified as a SPILLS site. In addition, eight spills have been reported within the recommended 1/8-mile search radius of the subject property:

1. Bastian Company, located at the subject property at 122 N. Genesee Street had a number of Spills reported in the late 90's and 2000's relating to leaking deteriorated drums in a drum storage area that contained plating chemicals and plating waste and unidentified chemicals (assumed to be petroleum and/or plating waste) that were encountered below the slab during excavation, removal and replacement of the concrete slab.

The documented Bastian Company Spills are considered a **Recognized Environmental Condition** given that the Spill problem seemed to be recurring and the cleanup responses were minimal, really only consisting of an emergency response approach to cleanup visible spillage without additional investigation with respect to further release to the environment at the subject property.

2. The Former H.B. Fuller Monarch Div. Property, located at 61 Gates Avenue at a distance of approximately 100 feet north/northeast of the subject property, is listed in the SPILLS database and was also previously discussed due to its enrollment in the NYSDEC VCP and ongoing site management requirements and therefore considered a **Controlled Recognized Environmental Condition**. The site also has records of historic spills documented as petroleum and various acids.
3. Univar Solutions USA Inc. also located at 61 Gates Avenue, and the successor company that occupied the property after a sale in the mid-nineties, is listed in the SPILLS database. A spill of potassium hydroxide occurred in 2016 outside the facility from a leaking over-the-road truck. The spill was cleaned up to the satisfaction of the NYSDEC and no further cleanup was deemed necessary by the NYSDEC.
4. Univar Solutions USA Geneva also located at 61 Gates Avenue is listed in the Spills database. A spill, consisting of diesel fuel released from an over-the-road truck occurred in 2020. Diesel fuel was reported to run down the driveway to the shoulder of Gates Avenue where it was cleaned up. The spill was cleaned up to the satisfaction of the NYSDEC and no further cleanup was deemed necessary by the NYSDEC.
5. Elston Electronics Corp., located at Avenue E and Lehigh Street approximately 250 feet northwest of the subject property, is listed in the SPILLS database. This listing dated 1987 indicates a local citizen reported a chlorine leak at the facility that resulted in an evacuation of facility employees. The listing indicates NYSDEC air resources to follow up with no further action required by the NYSDEC spill section.

6. Elston Electronics, located at Avenue E and Lehigh Street approximately 250 feet northwest of the subject property has a second listing in the SPILLS database. This listing indicates a local citizen reported illegal dumping or disposal. No other pertinent information regarding the spill is provided in the listing.
7. NYSDEC (Dan Hart Paving), located 36 Gates Avenue approximately 325 feet north/northeast of the subject property, has a listing in the NYSDEC Spills database relating to a report in 1996 of two leaking abandoned drums that were observed on the property. The drums and the contaminated soil beneath the drums were removed and disposed off-site. The spill was cleaned up to the satisfaction of the NYSDEC and no further cleanup was deemed necessary by the NYSDEC.
8. The Former Market Basket Site, located at the corner of Lehigh and Gates Avenue approximately 336 feet north/northwest of the subject property, has a listing in the NYSDEC Spills database. The Former Market Basket Site was previously identified as a **Controlled Recognized Environmental Condition** on the basis of its enrollment in the NYSDEC ERP and ongoing site management plan. The Spills listing relates to two reported areas of petroleum releases in 1998 including contaminated soil observed during removal of an 8,000-gallon gasoline UST and floating product and soil contamination was also evident in an area adjacent to an old boiler room but no UST was found. No further cleanup was deemed necessary by the NYSDEC spills unit as the site was being managed through the State ERP program.
9. A Private Residence, located at 165 North Genesee St apartment #2 was reported as dumping waste oil on the property. The NYSDEC investigated finding no evidence of oil and closed the spill requiring no further action from the Spills group.

Other than the three sites above that are referenced as a *recognized environmental condition* or a *controlled recognized environmental condition*, Marks Engineering does not expect any of the remaining spill sites to impact the subject property on the basis of the sites listing in the SPILLS database. Based on the information provided in the NYSDEC spill file the spills are de minimis in nature and the spills were closed to the satisfaction of the NYSDEC without requiring any further action.

3.1.3 Other Pertinent Ascertainable Records

The RCRA Non-Generator (NonGen) / No Longer Regulated (NLR)

The RCRA NonGen/NLR list includes information on sites that formerly generated, transported, stored, treated and/or disposed of hazardous waste. These sites do not presently generate hazardous waste. A review of the RCRA NonGen/NLR list reported six sites within $\frac{1}{4}$ -mile radius of the subject property:

1. Elston Electronics Corp., located at Avenue E and Lehigh Street approximately 250 feet northwest of the subject property, is listed in the NonGen/NLR database. The facility is listed as a former LQG with no recorded violations present in the database.
2. The Former Market Basket Site, located at the corner of Lehigh and Gates Avenue approximately 336 feet north/northwest of the subject property, is listed in the NonGen/NLR database. The facility is listed as a former SQG that shipped ignitable (D001), corrosive (D002), reactive (D003) and lead (D008) waste with no recorded violations present in the database.
3. New York Telephone (NYNEX), located at 190 Lyons Road at a distance of approximately 0.188 miles northeast of the subject property, is listed in the NonGen/NLR database. The facility is listed as a former CESQG that shipped corrosive (D002) and reactive waste (D003) with no recorded violations present in the database.
4. Charles Freihofer Baking Company, located at 195 N Exchange Street approximately 0.195 miles north/northwest of the subject property, is listed in the NonGen/NLR database. The facility is listed as a former CESQG that shipped ignitable (D001) corrosive (D002) lead (D008) and spent halogenated solvent (F01) waste with no recorded violations present in the database.
5. Choffin Leona, located at 377 N Genesee Street approximately 0.209 miles north/northwest of the subject property, is listed in the NonGen/NLR database. The generator is listed as a former LQG that shipped ignitable (D001) and benzene (D018) waste with no recorded violations present in the database.
6. The Geneva High School, located at 219 Lyons Road approximately 0.246 miles north/northeast of the subject property, is listed in the NonGen/NLR database. The generator is listed as a former LQG that shipped ignitable (D001), cadmium (D006) and mercury (D009) waste with no recorded violations present in the database.

Marks Engineering does not expect any of the above sites to impact the subject property on the basis of the sites presence in the NonGen/NLR database.

Formerly Used Defense Sites (FUDS)

The listing includes locations of Formerly Used Defense Sites (FUDS) properties where the US Army Corps of Engineers is actively working or will take necessary cleanup actions. A review of the RCRA FUDS list reported one site within 1-mile radius of the subject property:

1. US Radiator Corp, with an unidentified address located approximately 0.843 miles south of the subject property, is listed in the FUDS database. No additional pertinent information is presented in the database.

Marks Engineering does not expect the above site to impact the subject property on the basis of the site's presence in the FUDS database.

Facility Index System (FINDS)

FINDS contains both facility information and 'pointers' to other sources that contain more detail. A review of the FINDS list reported the subject property and no other sites within 1-mile radius of the subject property:

1. E-Waste Systems formerly located at the subject property, with an address of 122 N. Genesee Street, was identified in the FINDS database. No additional pertinent information is presented in the database.

Marks Engineering does not expect the above site to impact the subject property on the basis of the site's presence in the FINDS database.

Enforcement and Compliance History Info (ECHO)

ECHO provides integrated compliance and enforcement information for about 800,000 regulated facilities nationwide. A review of the ECHO list reported the subject property and no other sites within 1-mile radius of the subject property:

1. E-Waste Systems formerly located at the subject property, with an address of 122 N. Genesee Street, was identified in the ECHO database. No additional pertinent information is presented in the database.

Marks Engineering does not expect the above site to impact the subject property on the basis of the site's presence in the ECHO database.

PFAS Enforcement and Compliance History Info (ECHO)

ECHO PFAS provides information on regulated entities that may be using PFAS. A review of the PFAS ECHO list reported one site within ¼-mile radius of the subject property:

1. Univar USA Inc, located at 61 Gates Avenue north of the subject property, was identified in the PFAS ECHO database. No additional pertinent information is presented in the database.

Marks Engineering does not expect the above site to impact the subject property on the basis of the site's presence in the PFAS ECHO database.

Manifest

The manifest list includes a listing of sites that have historically shipped hazardous waste. A review of the Manifest list reported the subject property and four sites within 1/4-mile radius of the subject property:

1. Univar Solutions USA – Geneva Branch, located at 61 Gates Avenue approximately 100 feet north of the subject property, is listed as a CESQG and LQG that historically shipped ignitable (D001), corrosive (D002) and reactive (D003) waste.
2. Elston Electronics Corp., located at Avenue E and Lehigh Street approximately 250 feet northwest of the subject property, is listed as a LQG.
3. NYSDEC (Dan Hart Paving), located 36 Gates Avenue approximately 325 feet north/northeast of the subject property, is listed as historically shipping waste associated with leaking abandoned drums and a spill on the property.
4. The Former Market Basket Site, located at the corner of Lehigh and Gates Avenue approximately 336 feet north/northwest of the subject property, is listed as a SQG that historically shipped ignitable (D001) corrosive (D002), reactive (D003) and lead (D008) waste.

5. CCN International, located at 200 Lehigh Avenue approximately 0.146 miles north of the subject property, is listed as a LQG and SQG that historically shipped ignitable (D001) and spent non halogenated solvent (F003 and F005) waste.
6. Bastian Co., located at 1 American Center approximately 0.175 miles west of the subject property, is listed as a SQG and LQG that historically shipped corrosive waste (D002).
7. New York Telephone (NYNEX), located at 190 Lyons Road at a distance of approximately 0.188 miles northeast of the subject property, is listed as a CESQG that historically shipped corrosive (D002) and reactive waste (D003).
8. New York Telephone, located at 190 Lyons Road at a distance of approximately 0.188 miles northeast of the subject property, is listed as a CESQG that historically shipped corrosive (D002) and reactive waste (D003).
9. Choffin Leona, located at 377 N Genesee Street approximately 0.209 miles north/northwest of the subject property, is listed as a LQG that historically shipped ignitable (D001) and benzene (D018) waste.
10. Dollar General, located at 194 N Exchange Street approximately 0.2 miles northeast of the subject property, is listed as a CESQG that historically shipped corrosive (D002) waste.
11. Sunoco, located at 1 Exchange Street approximately 0.243 miles south/southeast of the subject property, is listed as a LQG that historically shipped ignitable (D001) and 1,4-dichlorobenzene (D027) waste.
12. The Geneva High School, located at 219 Lyons Road approximately 0.246 miles north/northeast of the subject property, is listed as a LQG that historically shipped ignitable (D001), cadmium (D006) and mercury (D009) waste.

EDR Historic Auto

The EDR report includes a database of historic auto stations within 1/8-mile radius of the subject property. One historic auto station was identified within this search radius:

1. BMJ Transmissions, formerly located at 17 Hogarth Avenue at a distance of approximately 0.105 miles east/southeast of the subject property, is listed in the historic auto database from 2007 to 2014.

Marks Engineering does not expect the above site to impact the subject property on the basis of the sites listing in the Historic Auto Database. This business was not listed in any of the other environmental listings queried; therefore, no other violations or spills related to this business were identified. This business is no longer present and operated hydraulically down gradient of the subject property.

3.2 Historical Use Information on the Property

Owner and Operator History

The following provides a brief history of the subject property ownership and operations based on information from regulatory and historical documents.

Historical Maps, Aerial Photographs, and Directory Abstracts

Historical aerial photographs, topographic maps, City Directory abstracts, Sanborn® Maps, property tax maps and a building permit report were ordered from EDR. The available files provided by EDR are included in **Exhibit A, Exhibit B, Exhibit D, Exhibit E, Exhibit F** and **Exhibit G** respectively.

These historical documents were reviewed to develop the subject property operational history and to identify potential RECs for the site. The years of historical coverage, source of coverage, and an evaluation of the sources reviewed is presented below.

Document	Year	Source
Topographic Maps	1902, 1942/1943, 1952/1953, 1978, 2013, 2016 and 2019	EDR
Aerial Photographs	1938, 1959, 1963, 1985, 1995, 2008, 2011, 2015 and 2019	EDR

Sanborn® Maps	1897, 1903, 1909, 1915, 1925, 1947 and 1967	EDR
City Directory Report	1992, 1995, 2000, 2005, 2010, 2014 and 2017	EDR
Property Tax Maps	No coverage provided by EDR	EDR
Building Permits	No coverage provided by EDR	EDR

The following timeline was developed by reviewing topographic maps, aerial photographs and Sanborn® Maps for the subject property location.

- The Sanborn map from 1897 depicts a single structure labeled as the Empire State Can Manufacturing Company in the southeast corner of the subject property. Directly to the north of this structure, also on the subject property, is a group of smaller connected/adjoining structures identified as the Torrey Park Preserving Company. The remainder of the subject property to the north and west is devoid of structures and undeveloped with the exception of the vacant roadways labeled as Avenue D, Lehigh St. and Ontario St. that occupy the west portion of the subject property. These features are consistent with what is mapped on the 1902 topographic map.
- The Torrey Park Preserving Company is still present on the Sanborn map from 1903 with little observed change from the previous 1897 map; however, the Empire State Can Manufacturing Company has been replaced with the American Can Company. The original Empire State Can Co. building remains on the southeast corner of the subject property; however, a larger factory building has now been constructed immediately west of the original Empire State Can Co. building. Some small ancillary structures are also present west of the new factory building. Railroad tracks and sidings that serve the subject property now occupy what was formerly labeled as Avenue D. Avenue D, Lehigh St. and Ontario St. are no longer mapped on the subject property.
- The structures depicted on the subject property appear unchanged on the 1909 Sanborn Map as compared with the previous 1903 map, with the exception of a small storage shed that is now visible west of the American Can Company factory buildings. The Torrey Park Preserving Company is now listed as “closed” and a lumberyard labeled as Robson and Monroe Lumber now occupies the former Torrey Park Preserving Co. structures.
- The American Can Company is listed as “Not In Operation” on the 1915 Sanborn map. The two factory structures are still depicted and unchanged; however, the smaller ancillary structures and the warehouse building west of the factory have been demolished and are no longer depicted. The lumberyard to the north of the canning factory buildings is no longer present and is now occupied by the Loomis and Desmore Cider Mill and Evaporator. Some of the original lumber yard/preserving company buildings have now been demolished and replaced with what is now mapped as an evaporator and cider warehouse.
- On the 1925 Sanborn map the two original canning company buildings appear to have been demolished and replaced with a large building that occupies the entirety of the southeast corner of the subject property labeled as the American Can Co. Geneva Machine Shop. Some small sheds and storage buildings are present to the west of this new main building. To the north, the Cider Mill and Evaporator are no longer present, and the buildings are now labeled “storage”. The structures on the very north end of the L shaped parcel, adjacent to Gates Avenue, remain but are now occupied by the Rapalee Coke and Coal Corporation.
- On the 1938 aerial photo and the 1947 Sanborn map, the American Can Company building on the southeast corner of the subject property has been vastly expanded to occupy the entirety of the south portion of the subject property. General offices, lockers and a cafeteria are mapped in the western portion of this structure with the remainder of the building labeled as machining, heat treating and parkerizing. Fuel oil tanks are depicted on the 1947 Sanborn adjacent to the rail siding on the southeast corner of the subject property. The very north end of the L shaped subject property, adjacent to Gates Avenue, has now been developed and is labeled as the Seneca Steel and Iron Company Metal Junk Yard. These features are consistent with what is mapped on the 1942/1943 topographic map.
- On the 1959 aerial photo and the 1967 Sanborn map the American Can Company building has undergone another large expansion and a warehouse structure connected to the manufacturing building occupies the majority of the north portion of

the L shaped subject property. The warehouse expansion is labeled as constructed in 1953 on the Sanborn map. The structures formerly occupied by Seneca Steel and Iron on the very north end of the L shaped subject property, adjacent to Gates Avenue, have been demolished and there is no occupancy or structures on that portion of the subject property. These features are consistent with what is mapped on the 1952/1953 topographic map and visible on the 1963 aerial photograph.

- The 1985 aerial photo does not depict any discernable changes to the building footprint on the subject property from the previous 1963 aerial photo. These features are consistent with what is mapped on the 1978 topographic map.
- The 1995 aerial photo does not depict any discernable changes to the building footprint on the subject property from the previous 1985 aerial photo. It appears that the very north end of the L shaped subject property, adjacent to Gates Avenue is being used for outdoor storage.
- The 2008, 2011, 2015 and 2019 aerial photographs depict features that are consistent with present day features at the subject property and do not show any discernable changes from the 1995 aerial photo. The petroleum ASTs and operations associated with the City of Geneva DPW, that occupies the southeast portion of the subject property, are visible in all four photographs. The topographic mapping from 2013, 2016 and 2019 only show surface topography features and roads; building structure mapping of the subject property and surrounding properties are no longer depicted on the topographic map sheets.

3.3 Historical Use Information on Adjoining Properties

Below is a timeline of the development of immediately adjoining properties based on topographic maps, aerial photographs and Sanborn® Maps.

- The Sanborn map from 1897 depicts two railroad tracks south of the subject property, a single NYCRR railroad track to the east, Genesee Street to the west, the Goble Bros. Lumber Yard and Dillman Bros. Copper Shop to the northwest. These features are consistent with what is mapped on the 1902 topographic map.
- The Sanborn map from 1903 depicts two railroad tracks south of the subject property (with residential structures beyond), four NYC&HRRRR railroad tracks to the east, N. Genesee Street to the west, the Torrey Park Lumber, Coal and Wood Yard and Dillman Bros. Cold Storage and Ice Plant to the northwest. The Geneva Cutlery Company is now present and mapped west of the north end of the L shaped subject property.
- The Sanborn map from 1909 depicts two railroad tracks south of the subject property (with residential structures beyond), two NYC&HRRRR railroad tracks and two adjacent sidings to the east, N. Genesee Street to the west, the Torrey Park Lumber, Coal and Wood Yard and Dillman Bros. Cold Storage to the northwest. The Geneva Cutlery Company is depicted west of the north end of the L shaped subject property.
- The Sanborn map from 1915 depicts two railroad tracks south of the subject property (with residential structures beyond), two NYC&HRRRR railroad tracks and two adjacent sidings to the east (with subdivided vacant parcels beyond), N. Genesee Street to the west, the Torrey Park Lumber, Coal and Wood Yard and Dillman Bros. Cold Storage and Ice Plant to the northwest. The Geneva Cutlery Company is depicted west of the north end of the L shaped subject property and has undergone significant expansion compared to the previous 1909 map.
- The Sanborn map from 1925 depicts two railroad tracks south of the subject property (with residential structures beyond), two NYC&HRRRR railroad tracks and a single adjacent siding to the east (with subdivided vacant parcels beyond), N. Genesee Street to the west, the W M L Vogt & Son Lumber, Coal and Wood Yard and the Geneva Refrigerating Corp. to the northwest. The Geneva Cutlery Company is depicted west of the north end of the L shaped subject property and has undergone another significant expansion compared to the previous 1915 map. These features are consistent with what is visible on the 1938 aerial photograph. Gates Avenue is also visible to the north of the subject property on the 1938 aerial.
- The Sanborn map from 1947 depicts two railroad tracks south of the subject property (with residential structures beyond), two NYC&HRRRR railroad tracks and a single adjacent siding to the east (with subdivided vacant parcels beyond), N. Genesee Street to the west, the W M L Vogt & Sons Lumber, Coal and Wood Yard and the WM Macintosh Frosted Foods Factory (Geneva Refrigerating Corp. owned) to the northwest. The Geneva Forge Inc. Cutlery Manufacturing now occupies what was formerly the Geneva Cutlery Company. Gates Avenue is also visible to the north of the subject property. These features are consistent with what is mapped on the 1942/1943 topographic map.

- The aerial photos from 1963 and the Sanborn map from 1967 depicts two railroad tracks south of the subject property (with residential structures beyond), two NYC&HRRRR railroad tracks to the east (with storage buildings now constructed beyond the tracks labeled as Wood Basket Storage and WM Macintosh Frosted Foods Storage), N. Genesee Street to the west, the W M L Vogt & Sons Lumber, Coal and Wood Yard and the WM Macintosh Frosted Foods Factory (Geneva Refrigerating Corp. owned) to the northwest. Sterns Nurseries Inc. now occupies what was formerly The Geneva Forge Inc. Cutlery Manufacturing facility. Gates Avenue is also visible to the north of the subject property. These features are consistent with what is mapped on the 1952/1953 topographic map. It is not clear in the 1959 aerial if the warehouses to the east have been constructed, they are clearly visible in the 1963 aerial.
- The 1985 aerial photo does not depict many discernable changes to the immediately adjoining properties compared to the 1963 aerial. The railroad tracks south of the subject property are gone compared to the 1963 aerial when they were still present. The building footprint on the adjoining property to the North (61 Gates Avenue) is expanded to match the present-day footprint of the building on this parcel (Univar). These features are consistent with what is mapped on the 1978 topographic map.
- The 1995 aerial photo does not depict any discernable changes to the immediately adjoining properties compared to the 1985 aerial.
- In the 2008 aerial much of the former cutlery factory is demolished, most of the structures on the former Geneva Refrigerating Corp. property are also gone, with the exception of one building, and replaced with a paved parking area. Quite a bit of wooded vegetation has overtaken the former railbed to the south of the subject property.
- The 2011, 2015 and 2019 aerial photographs depict features that are consistent with present day features on the adjoining properties. The topographic mapping from 2013, 2016 and 2019 only show surface topography features and roads; building structure mapping of the subject property and surrounding properties are no longer depicted on the topographic map sheets.

3.4 City Directory Abstracts

Marks Engineering obtained a City Directory Report from EDR (**Exhibit D**). The City Directory Report provides a listing of businesses and/or previous land use associated with a specific address. Records were provided for addresses on N. Genesee Street and the nearest cross street (Avenue E) for 1992, 1995, 2000, 2005, 2010, 2014 and 2017. Notable items from the City Directory Report are as follows:

- Subject Property – The following are listed as occupants of the subject property from 1992 through 2017:
 - 1992 - Bastian Co. Inc., Carroll and Keavny Electrical Contractors Inc., and CCMI Inc.
 - 1995 - Bastian Co. Inc., Carroll and Keavny Electrical Contractors Inc., Carroll and Keavny Inc., Metal Arts Co., RCH Associates, RCSA Inc., Small Business Development Center., TGT Inc.
 - 2000 – Felt Crafts, Geneva Business Assistance Center, Lauraville Specialty Products LLP, Metal Arts Company, PM Lighting, RCH Associates.
 - 2005 – Amico Paul, D, Bastio Co. Inc., Datu Inc.
 - 2014 – 12VeDegrees, Geneva Enterprise Development Center, Hudson Data LLC, Lakeside Entertainment, Metro Cartridge LLC., Safe Harbors of the Finger Lakes, Safe Harbors of the Finger Lakes Inco, Unity Employment Services, WWS Associates Inc.
 - 2017 - 12VeDegrees, Geneva Enterprise Development Center, Hudson Data LLC, Lakeside Entertainment, Metro Cartridge LLC., Safe Harbors of the Finger Lakes Inc., Second Look Maintenance Inc., Unity Employment Services, WWS Associates Inc.
- Adjacent properties to the north, south, east and west – The remainder of the listings in the City Directory Report were consistent with the residential and commercial nature of the surrounding adjacent properties.
- No other notable listings or notable commercial properties were listed in the City Director Report for the adjacent and surrounding parcels.

3.5 Property Tax Maps

EDR did not return any records for property tax maps (**Exhibit F**); however, property tax maps available in the Ontario County Online Resources (OnCOR) Property App were reviewed by Marks Engineering and referenced to generate this report.

3.6 Building Permits

EDR did not return any records for building permits for the subject property (**Exhibit G**).

3.7 Environmental Lien and AUL Search Results

Marks Engineering obtained an environmental lien and activity and use limitation (AUL) search report for the subject property from EDR (**Exhibit H**). No records of environmental liens or AULs were found pertaining to the subject property.

4.0 SITE RECONNAISSANCE

4.1 Methodology and Limiting Conditions

Marks Engineering conducted a site reconnaissance on February 17, 2023, for the purpose of documenting conditions at the subject property and conditions of surrounding properties to identify known and/or suspected RECs. The inspection was conducted on foot by traversing the accessible portions of the subject property. The entire property was inspected; however, some of the interior spaces of the subject property was not entered at the time of the site reconnaissance as some office areas were locked. Representative photographs depicting the subject property at the time of the site reconnaissance are provided in **Attachment A**.

4.2 General Site Setting

The subject property is located at 122 N. Genesee Street, Geneva, New York (See **Figure 1**). The 6.7-acre subject property is located in the City of Geneva, County of Ontario, New York and is identified as Tax Parcel 90.20-1-19 (See **Figure 2**). The subject property is L shaped and bounded to the north by Avenue D and Gates Avenue, to the south by a wooded earthen berm that served as a former rail bed (tracks are no longer present), to the east by a rail siding and a vacant metal clad commercial/storage building (51 Central Avenue) and to the west by N. Genesee Street and residential properties (See aerial photography provided in **Exhibit A**).

The current Owner of the subject property is the City of Geneva IDA with an address of 47 Castle Street, Geneva, NY. The subject property is currently operated by the GEDC, a local business incubator that operates the site to repurpose the former industrial complex and promote its repurposed use for manufacturing, service providers, non-profits, arts & crafts, performing arts, office use, technology companies, and more.

4.3 Observations

Marks Engineering was able to access the entirety of the subject property with the exception of the roof of the building (which was partly visible and photographed from some of the adjacent interior spaces) and some of the interior office space portions of the building were locked and were not entered at the time of the site reconnaissance. These office areas would not typically present an environmental risk.

The following are observations made during the site reconnaissance.

4.3.1 Hazardous Substances and Petroleum Products

The subject property consists of a vast 200,000 square foot former manufacturing building that has been subdivided to serve the needs of a variety of tenants. Marks Engineering walked the entirety of the building during the site reconnaissance. Most of the current tenants' use of the building includes office and storage with some light manufacturing observed. The current chemical usage within the building was limited and fairly benign; the current tenants that have manufacturing operations include food prep, a distillery and woodworking. The City of Geneva DPW currently occupies a large area in the southeast corner of the subject property. Here, as expected, hazardous substances and petroleum products were observed associated with fleet refueling and maintenance as well as fuel storage for an emergency backup generator. Marks Engineering did not observe any additional notable hazardous substances or petroleum products during the site reconnaissance.

4.3.2 Above Ground and Underground Storage Tanks

The City of Geneva operates six registered PBS ASTs at the subject property including a 5,000-gallon gasoline tank installed in 1998, a 3,000-gallon diesel installed in 1998, a 300-gallon diesel tank installed in 1998, two 160-gallon lube oil tanks installed in 2006, and a 160-gallon hydraulic oil tank installed in 2006. All tanks have associated fuel islands or dispensers for on-site use. Marks Engineering also observed tanks in the distillery and food prep areas of the subject property; however, these tanks would not fall under any formal registration requirements from an environmental perspective. Marks Engineering did not observe any evidence or records of current or historic USTs during the site reconnaissance.

4.3.3 Odors

Marks Engineering did not observe any noxious odors indicative of hazardous substances or petroleum products during the site reconnaissance.

4.3.4 Pools of Liquid

Marks Engineering did not identify any suspect pools of liquid during the site reconnaissance. The basement floor in the boiler room of Building A was notably dry.

4.3.5 Drums

Marks Engineering observed drums in the City of Geneva DPW area of the subject property. Noticeable leaks, spills etc. were not observed associated with drum storage.

4.3.6 Hazardous Substance and Petroleum Product Containers

As mentioned above the current chemical usage within in the building was limited and fairly benign; the current tenants that have manufacturing operations include food prep, a distillery and woodworking. The City of Geneva DPW currently occupies a large area in the southeast corner of the subject property. Here, as expected, hazardous substances and petroleum products were observed associated with fleet refueling and maintenance as well as fuel storage for an emergency backup generator. Marks Engineering did not observe any additional notable hazardous substances or petroleum products during the site reconnaissance.

4.3.7 Unidentified Substance Containers

Marks Engineering did not observe any unidentified substance containers during the site reconnaissance.

4.3.8 Polychlorinated Biphenyls

The subject property is served by NYSEG. A variety of transformers and electric subpanels were observed throughout the subject property. Given the age of the facility the presence of PCBs and mercury switches related to older transformers and switching devices is not ruled out.

4.3.9 Heating and Cooling

Natural Gas is provided to the subject property by NYSEG. The building is not served by a central HVAC system. Large natural gas boilers in the basement of Building A, gas hot water heaters (tank style) and a number of overhead gas space heaters were observed in the various sections and subdivided spaces of the building.

4.3.10 Stains or Corrosion

The facility encompasses 200,000 square feet of former industrial manufacturing space that operated for almost a century. As expected, the concrete slab in the former manufacturing areas did have some areas of observed staining. The concrete floors in the building generally were in good shape without any significant spalling or deterioration observed. There were areas of concrete that were observed to be patched and replaced through the years to serve the needs of the time.

4.3.11 Drains and Sumps

Storm water grates were observed outside the building and in loading docks as well as the interior space of the DPW. Floor drains were not observed within the former manufacturing spaces of the building.

4.3.12 Pits, Ponds, and Lagoons

No pits, ponds or lagoons were observed during the site reconnaissance.

4.3.13 Stained Soil or Pavement

The majority of the subject parcel is covered with the footprint of the building. There was some staining as expected on the concrete pad adjacent to the City of Geneva DPW fuel tanks at the southeast corner of the subject property. This is assumed to be related to ancillary leaks and spillage during vehicle refueling.

4.3.14 Stressed Vegetation

Areas of vegetation cover at the subject property is minimal. Marks Engineering did not observe any stressed vegetation during the site reconnaissance.

4.3.15 Solid Waste

Solid waste generated at the subject property includes primarily sanitary waste or common trash generated from the subject property tenants that is collected and transported to a local municipal waste landfill. The City of Geneva DPW would presumably additionally generate some hazardous waste, but these records were not specifically queried as part of the site reconnaissance.

4.3.16 Wastewater

Municipal sanitary sewer services are provided to the subject property by the Town of Geneva Water and Sewer Department. Various sewer connections, piping and cleanouts were observed throughout the subject property. No historic or present-day septic system is reported at the subject property.

4.3.17 Wells

No potable water well(s) or other wells were observed on the subject property at the time of the site reconnaissance.

4.3.18 Septic System

No historic or present-day septic system is reported at the subject property. Evidence of a historic septic system was not observed at the subject property during the site reconnaissance.

4.3.19 Imported Fill

No evidence of historic fill was observed on the subject property during the site reconnaissance.

5.0 STAKEHOLDER INTERVIEWS

5.1 User Interview

The City of Geneva IDA is the User of this Phase I ESA. The IDA indicated that the purpose of performing the Phase I ESA is to evaluate the viability of continuing operating the subject property as the GEDC and to understand what environmental liabilities, if any, may be associated with the subject property and its building structure.

The City of Geneva IDA (The User) was not present during the site reconnaissance; however, the User referred Marks Engineering to the User's representative, Mr. Myles Webster of Webster Properties, LLC (Webster Properties), for access and coordination of the site reconnaissance. Webster Properties serves as the building management firm responsible for maintenance of the property. Mrs. Hannah DeLone, an employee of Webster properties, was present during the site reconnaissance and escorted Mr. Jeremy Wolf of Marks Engineering through the building to perform the site reconnaissance. Mrs. DeLone acknowledged that she is employed at Webster properties along with her husband and that they both maintain the building and serve as the day-to-day point of contact for the tenants of the building. Mrs. DeLone indicated that her husband was a former longstanding employee with the American Can Company and is very familiar with the facility, he unfortunately was not able to attend the site reconnaissance. Mrs. DeLone acknowledged that she was familiar with the manufacturing history of the subject property as the American Can Company and that its present-day use was to repurpose the space as a local business incubator. Mrs. DeLone was also familiar with the tenants and their business activities during the subject property's tenure as the GEDC. Mrs. DeLone did not provide any knowledge of known environmental impairment at the subject property, but she indicated that the City of Geneva Public Works portion of the building is one of the areas that we would want to specifically look at because of the fleet maintenance and fleet storage and fueling that they perform.

5.2 Owner Interview

The current Owner of the subject property is the City of Geneva IDA. The City of Geneva IDA was created to promote, develop, encourage, and assist in acquiring, constructing, maintaining, equipping, and furnishing certain types of projects and facilities, to advance the job opportunities, health, general prosperity, economic welfare, and recreation opportunities of the citizens of the City of Geneva (City of Geneva, 2007). The IDA is comprised of a seven-member board and four officers including a chairperson, vice chairperson, secretary and treasurer.

Marks Engineering services were retained by Tracy Verrier, Executive Director & Procurement Officer for the IDA. Ms. Verrier was not present during the site reconnaissance; however, she provided a generic background of the subject property's history and the reasoning for the IDA's desire to perform a Phase I ESA at the Site. Tracy acknowledged that the Site had a longstanding manufacturing history as the American Can Company and that its present-day use was to repurpose the space as a local business incubator. Tracy indicated that the IDA was also planning to procure an asbestos survey and an engineering evaluation of the building structure from other third-party vendors.

5.3 Occupant Interview

The site reconnaissance was performed on a Friday morning prior to a holiday weekend and therefore the majority of the building was empty at the time of the site reconnaissance. No specific tenant interviews were scheduled; however, Mr. Wolf explained the purpose of the site reconnaissance to any tenants that were encountered and/or inquired. Mr. Wolf spoke with one of the mechanics at the City of Geneva DPW who was present in the maintenance area at the time of the site reconnaissance. No tenants/occupants of the building identified any knowledge of pre-existing environmental conditions or impairment at the subject property.

6.0 DEVIATIONS

This Environmental Site Assessment was performed in conformance with the scope and limitations of ASTM Practice E1527-21 Phase I ESA Standard, with the exception of the following:

- Marks Engineering was able to access the entirety of the subject property with the exception of the roof of the building (which was partly visible and photographed from some of the adjacent interior spaces) and some of the interior office space portions of the building were locked and were not entered at the time of the site reconnaissance. These office areas would not typically present an environmental risk.

7.0 SUMMARY OF FINDINGS

The objective of this Phase I ESA was to evaluate the potential for significant adverse impacts from hazardous substances on or near the subject property based on visual observations, and a review of available records and historical information. The findings of this Phase I ESA are based on the assessment described in Sections 3.0 through 5.0 of this report. Any exceptions to, or deletions from, this practice are described in Section 1.4 and 6.0 of this report.

Recognized Environmental Conditions

Based on the information obtained during the review of environmental databases, historic information, site reconnaissance and interviews with people familiar with the property, there is evidence of *Recognized Environmental Conditions* associated with the current and historical usage of the subject property and adjoining land, nearby off-site sources of potential impact, and the potential environmental impact on the subject property from surrounding conditions or activities.

1. Bastian Company, located at the subject property at 122 N. Genesee Street had a number of Spills reported in the late 90's and 2000's relating to leaks from deteriorated drums in a drum storage area that contained plating chemicals and plating waste and other unidentified chemicals (assumed to be petroleum and/or plating waste) that were encountered below the concrete slab during excavation, removal and replacement of the concrete slab. The documented Bastian Company Spills are considered a *Recognized Environmental Condition* given that the Spill problem seemed to be recurring and the cleanup responses were minimal, really only consisting of an emergency response approach to cleanup visible spillage without additional investigation with respect to further release to the environment at the subject property.
2. The subject property has almost a century of documented manufacturing history as the American Can Company which included metal working and machining, heat treating, parkerizing, munitions and machinery production. Fuel oil tanks are depicted adjacent to the rail siding on the southeast corner of the subject property on the 1947 Sanborn without any recorded closure of these tanks provided in the EDR report. In addition, a scrap yard and a coke and coal operation at one time occupied the north portion of the subject property. These manufacturing and industrial past uses as well as petroleum storage tanks warrant a *Recognized Environmental Condition*. A variety of transformers and electric subpanels were observed throughout the subject property. Given the age of the facility the presence of PCBs and mercury switches related to older transformers and switching devices is not ruled out.
3. The subject property is identified as a current AST site. The City of Geneva Public Works Facility, located at the southeast corner of the subject property has six registered PBS ASTs at the property including a 5,000-gallon gasoline tank installed in 1998, a 3,000-gallon diesel installed in 1998, a 300-gallon diesel tank installed in 1998, two 160-gallon lube oil tanks installed in 2006, and a 160-gallon hydraulic oil tank installed in 2006. All tanks have associated fuel islands or dispensers for on-site use.

Although there are no reported non-compliance issues associated with the six ASTs located on the subject property, the number of years the tanks have been present and in service and the associated 25 years of filling these tanks and dispensing the petroleum contents of the tanks presents a *Recognized Environmental Condition*; as in all likelihood during that time incidental spills may have occurred which would result in a likely release to the environment at the subject property.

Controlled Recognized Environmental Conditions

*A Controlled Recognized Environmental Condition is a Recognized Environmental Condition affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of controls (for example, activity and use limitations or other property use limitations). Based on the information obtained during the review of environmental databases, historic information, site reconnaissance and interviews with people familiar with the property, there is evidence of **Controlled Recognized Environmental Conditions** associated with the current and historical usage of the subject property and adjoining land, nearby off-site sources of potential impact, and the potential environmental impact on the subject property from surrounding conditions or activities.*

1. The Former H.B. Fuller Monarch Div. Property is located at 61 Gates Avenue at a distance of approximately 100-feet north/northeast of the subject property. A boiler and circuit board manufacturer operated the facility until it was purchased in 1979 by Monarch Chemical (Monarch), a former operating division of H.B. Fuller Company. Monarch used the facility to manufacture food grade cleaners/sanitizers used in the dairy and related industries. H.B. Fuller Company sold the property and the business in 1996. Univar, Inc. is the current owner/operator of the site. Univar blends and distributes chemicals for the food industry. H.B. Fuller Company conducted several environmental assessments of the site as part of the 1996 property sale. The results identified contamination from volatile organic compounds, including tetrachloroethene and associated degradation products. The depth to groundwater ranges from approximately three to 13 feet below the ground surface. Groundwater generally flows eastward. Based on this information, H.B. Fuller Company submitted an application in 2001 to enter into New York State's Voluntary Cleanup Program (VCP). Remedial actions are complete, and measures are in place to control the potential for coming in contact with residual contamination remaining at the site. Site management activities include a deed restriction, maintenance of the existing soil cover, and a groundwater and soil vapor intrusion monitoring program.

The above site borders the subject property to the north. The Remedial Action at the site is complete and the site operates under a Site Management Plan with Institutional and Engineering Controls in place to manage the remaining residual contamination at the site. Given these conditions, the Former H.B. Fuller Monarch NYSDEC VCP Site is considered a *Controlled Recognized Environmental Condition*.

2. The former Market Basket site is located at the corner of Gates Avenue and Lehigh Street at a distance of approximately 0.064 miles north/northwest of the subject property. The site has had various uses since 1900 to 1986. The uses at the site included the Geneva Cutlery Company, Stearns Nursery, Inc., the Market Basket Corporation, general warehouse space, tool rentals and paint booth rental for do-it-yourself auto body repair. Exceedances of soil cleanup objectives include petroleum compounds, metals, and chlorobenzenes. Exceedances of the groundwater standards and guidance values included petroleum compounds, chlorinated solvent compounds, and chlorobenzenes. The depth to groundwater at the site ranges from 5 to 10 feet below the ground surface. The groundwater flow is in an easterly southeastern direction. The site was enrolled in the NYSDEC Environmental Restoration Program (ERP) and remediation at the Site is complete. Remedial actions have achieved soil cleanup objectives for commercial use. Residual contamination in the soil and groundwater at the Site will be managed under the Site Management Plan.

The above site borders the subject property to the northwest. The Remedial Action at the site is complete and the site operates under a Site Management Plan with Institutional Controls in place to manage the remaining residual contamination at the site. Given these conditions, the Former Market Basket NYSDEC ERP Site is considered a *Controlled Recognized Environmental Condition*.

Conclusions

The Phase I ESA was conducted in order to evaluate if the subject property presents any environmental liability to the Geneva IDA (the User) as the current "Owner" of the subject property. The *Recognized Environmental Conditions* and the *Controlled Recognized Environmental Conditions* listed above represent liability to the User as the current Owner of the property. If the User plans to transfer or sell the property further ground intrusive investigation (i.e., a Phase II ESA) likely would be warranted and/or required by the buyer. On the basis of the properties past use and surrounding historic use the presence of subsurface soil and/or groundwater contamination on the subject parcel is likely; however, the User should consider under the properties

present day use human exposure pathways to these contaminants do not exist. The property is in essence capped with the existing building and surrounding paved areas. Groundwater at the subject property is not used for potable use or any use for that matter. The age of the building and the lack of insulation in most areas minimizes the risk of soil vapor intrusion. The User would need to evaluate what the next steps are for the property to determine if further investigation is warranted. Marks Engineering would be happy to discuss next steps and/or potential scenarios, risks with the IDA.

9.0 SIGNATURES AND QUALIFICATIONS OF ENVIRONMENTAL PROFESSIONALS

The following environmental professionals were responsible for this report and declare the following statements:

I declare that, to the best of my professional knowledge and belief, I meet the definition of *Environmental Professional* as defined in 312.10 of 40 CFR Part 312 and I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Jeremy Wolf
Principal – Environmental Consultant

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527-21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

EXECUTIVE SUMMARY

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal sites subject to CERCLA removals and CERCLA orders

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 10/27/2022 has revealed that there is 1 SEMS site within approximately 0.5 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
HICKS SITE Site ID: 0204366 EPA ID: NYN000204366	185 NORTH GENESEE ST	NW 1/8 - 1/4 (0.160 mi.)	F23	151

Lists of Federal RCRA generators

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 11/21/2022 has revealed that there are 2 RCRA-LQG sites within approximately 0.25 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

EXECUTIVE SUMMARY

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 11/21/2022 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

BASTIAN CO EPA ID:: NYD987019957	1 AMERICAN CENTER	W 1/8 - 1/4 (0.175 mi.)	24	151

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 11/21/2022 has revealed that there are 2 RCRA-VSQG sites within approximately 0.25 miles of the target property.

Lists of state- and tribal hazardous waste facilities

SHWS: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Environmental Conservation's Inactive Hazardous waste Disposal Sites in New York State.

A review of the SHWS list, as provided by EDR, and dated 11/07/2022 has revealed that there is 1 SHWS site within approximately 1 mile of the target property.

Lists of state and tribal leaking storage tanks

LTANKS: Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills

A review of the LTANKS list, as provided by EDR, and dated 11/07/2022 has revealed that there are 8 LTANKS sites within approximately 0.5 miles of the target property.

CBS AST: Chemical Bulk Storage Database. Registration data collected as required by 6 NYCRR Part 596. It includes facilities storing hazardous substances listed in 6 NYCRR Part 597, in aboveground tanks with capacities of 185 gallons or greater, and/or in underground tanks of any size. Includes facilities registered (and closed) since effective date of CBS regulations (July 15, 1988) through the date request is processed.

A review of the CBS AST list, as provided by EDR, and dated 01/01/2002 has revealed that there is 1 CBS AST site within approximately 0.25 miles of the target property.

Lists of state and tribal voluntary cleanup sites

VCP: Voluntary Cleanup Agreements. The voluntary remedial program uses private monies to get contaminated sites remediated to levels allowing for the sites' productive use. The program covers virtually any kind of site and contamination.

A review of the VCP list, as provided by EDR, has revealed that there is 1 VCP site within approximately 0.5 miles of the target property.

ERP: In an effort to spur the cleanup and redevelopment of brownfields, New Yorkers approved a \$200 million Environmental Restoration or Brownfields Fund as part of the \$1.75 billion Clean Water/Clean Air Bond Act of 1996 (1996 Bond Act). Enhancements to the program were enacted on October 7, 2003. Under the Environmental Restoration Program, the State provides grants to municipalities to reimburse up to 90 percent of on-site eligible costs and 100% of off-site eligible costs for site investigation and remediation activities. Once remediated, the property may then be reused for commercial, industrial, residential or public use.

A review of the ERP list, as provided by EDR, and dated 11/07/2022 has revealed that there are 2 ERP sites within approximately 0.5 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Records of Emergency Release Reports

NY Spills: Data collected on spills reported to NYSDEC. is required by one or more of the following: Article 12 of the Navigation Law, 6 NYCRR Section 613.8 (from PBS regs), or 6 NYCRR Section 595.2 (from CBS regs). It includes spills active as of April 1, 1986, as well as spills occurring since this date.

A review of the NY Spills list, as provided by EDR, and dated 11/07/2022 has revealed that there are 8 NY Spills sites within approximately 0.125 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there is 1 EDR Hist Auto site within approximately 0.125 miles of the target property.

[Click Here for FRS Facility Detail Report:](#)

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Registry ID: 110055485595

[Click Here for FRS Facility Detail Report:](#)

Environmental Interest/Information System:

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

the City of Geneva. The site is approximately 830 feet west of the intersection of State Route 14 and Gates Avenue. Site Features: The site slopes towards the south and includes a 33,700-square foot manufacturing building, and an above-ground storage tank containment area. The building is surrounded by a parking lot and the northern portion of the site is fenced to control access. The northern tip of the site is covered with vegetation. Current Zoning and Land Use: The site is currently active and is zoned for industrial use. Properties bordering the site include a furniture manufacturer to the north, railroad tracks to the east, and open lots and vacant manufacturing facilities to the south and west. The nearest residential property is approximately 250 feet east on Gates Avenue. Past Use of the Site: The facility was reportedly constructed in the 1910's and was improved with additions in the 1930's and 1950's. A boiler and circuit board manufacturer operated the facility until it was purchased in 1979 by Monarch Chemical (Monarch), a former operating division of H.B. Fuller Company. Monarch used the facility to manufacture food grade cleaners/sanitizers used in the dairy and related industries. H.B. Fuller Company sold the property and the business in 1996. Univar, Inc. is the current owner/operator of the site. Univar blends and distributes chemicals for the food industry. H.B. Fuller Company conducted several environmental assessments of the site as part of the 1996 property sale. The results identified contamination from volatile organic compounds, including tetrachloroethene and associated degradation products. Based on this information, H.B. Fuller Company submitted an application in 2001 to enter into New York State's Voluntary Cleanup Program. Site Geology and Hydrogeology: The ground surface at the site generally slopes to the south. The depth to bedrock (limestone) is greater than 24 feet. The overburden consists of fine-grained soils. The depth to groundwater ranges from approximately three to 13 feet below the ground surface. Groundwater generally flows eastward. "

Env Problem: "Remediation at the site is complete. Prior to remediation, the primary contaminants of concern included tetrachloroethene, trichloroethene, 1,1,1-trichloroethane, and associated degradation products in soil and groundwater. Site management activities include a deed restriction, maintenance of the existing soil cover, and a groundwater and soil vapor intrusion monitoring program. "

Health Problem: "Remedial actions are complete and measures are in place to control the potential for coming in contact with residual contamination remaining at the site."

the City of Geneva. The site is approximately 830 feet west of the intersection of State Route 14 and Gates Avenue. Site Features: The site slopes towards the south and includes a 33,700-square foot manufacturing building, and an above-ground storage tank containment area. The building is surrounded by a parking lot and the northern portion of the site is fenced to control access. The northern tip of the site is covered with vegetation. Current Zoning and Land Use: The site is currently active and is zoned for industrial use. Properties bordering the site include a furniture manufacturer to the north, railroad tracks to the east, and open lots and vacant manufacturing facilities to the south and west. The nearest residential property is approximately 250 feet east on Gates Avenue. Past Use of the Site: The facility was reportedly constructed in the 1910's and was improved with additions in the 1930's and 1950's. A boiler and circuit board manufacturer operated the facility until it was purchased in 1979 by Monarch Chemical (Monarch), a former operating division of H.B. Fuller Company. Monarch used the facility to manufacture food grade cleaners/sanitizers used in the dairy and related industries. H.B. Fuller Company sold the property and the business in 1996. Univar, Inc. is the current owner/operator of the site. Univar blends and distributes chemicals for the food industry. H.B. Fuller Company conducted several environmental assessments of the site as part of the 1996 property sale. The results identified contamination from volatile organic compounds, including tetrachloroethene and associated degradation products. Based on this information, H.B. Fuller Company submitted an application in 2001 to enter into New York State's Voluntary Cleanup Program. Site Geology and Hydrogeology: The ground surface at the site generally slopes to the south. The depth to bedrock (limestone) is greater than 24 feet. The overburden consists of fine-grained soils. The depth to groundwater ranges from approximately three to 13 feet below the ground surface. Groundwater generally flows eastward. "

Env Problem: "Remediation at the site is complete. Prior to remediation, the primary contaminants of concern included tetrachloroethene, trichloroethene, 1,1,1-trichloroethane, and associated degradation products in soil and groundwater. Site management activities include a deed restriction, maintenance of the existing soil cover, and a groundwater and soil vapor intrusion monitoring program. "

Health Problem: "Remedial actions are complete and measures are in place to control the potential for coming in contact with residual contamination remaining at the site."

Environmental Interest/Information System:

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

TSCA SUBMITTER

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA

program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

HAZARDOUS WASTE BIENNIAL REPORTER

SSTS (Section Seven Tracking System) evolved from the FIFRA and TSCA Enforcement System (FATES). SSTS tracks the registration of all pesticide-producing establishments and tracks annually the types and amounts of pesticides, active ingredients, and related devices that are produced, sold, or distributed each year.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

MARKET BASKET SITE (Continued)

S105589981

Site Description: "Location: The Market Basket site is a 2.475-acre site located within the City of Geneva. The area surrounding the site is an urban area. The site is located approximately 0.18 miles west of the intersection of Gates Avenue and State Route 14. Site Features: The site is relatively flat and is covered with soil and gravel material. The site vacant and Gates Avenue divides the site into the northern (Parcel A) and southern (Parcel B) parcels. Current Zoning: The site is currently vacant and is zoned for industrial use. The surrounding parcels are currently used for a combination of commercial, light industrial, and residential. The nearest residential properties are located directly across from the site on the western side of Lehigh Avenue. Past Use of the Site: The Site has had various uses since 1900 to 1986. The uses at the Site included the Geneva Cutlery Company, Stearns Nursery, Inc., the Market Basket Corporation, general warehouse space, tool rentals and paint booth rental for do-it-yourself auto body repair. The Site has been vacant since 1986. Minimal environmental activities have been reported at the Site prior to entering the Environmental Restoration Program. The City of Geneva Engineering Department inspected the Site February 1997 and noted approximately twenty 55-gallon drums and dozens of five-gallon containers of unknown origin or contents within the buildings and on the Site grounds. Some of the containers were reportedly in poor condition with evidence of leakage and the City of Geneva had the drums and containers removed for proper off-site disposal. The Site s buildings also had been significantly damaged and contained friable asbestos pipe insulation. The Geneva Fire Department in 1987 noted that the building was in a deplorable condition and a very definite fire hazard and the structural integrity of portions of the building (holes in the floors and collapsing ceilings and roof supports) pose a genuine threat to the lives of firefighters. The prior uses that potentially lead to the Site contamination include paint booth, automotive repairs, cutlery, and manufacturing. Site Geology and Hydrogeology: Fill material encountered at the site consists of sand, gravel, masonry materials, and cinders. The site s soils are primarily fine-grained sands with varying amounts of silt and clay. Bedrock was not encountered at the site. The depth to groundwater at the site ranges from 5 to 10 feet below the ground surface. The groundwater flow direction is in an easterly south eastern. "

Env Problem: "Nature and Extent: The nature and extent of contamination was defined under the remedial investigation. The primary contaminants of concern at the Site include petroleum hydrocarbons (benzene, ethyl benzene, 1,2,4-trimethylbenzene, 1,3,5-trimethylbenzene, and xylenes), chlorinated solvent compounds (trichloroethene, dichloroethene, and vinyl chloride), chlorobenzenes, and metals (chromium, copper, mercury, nickel, and zinc). Exceedances of soil cleanup objectives include petroleum compounds, metals, and chlorobenzenes. Exceedances of the groundwater standards and guidance values included petroleum compounds, chlorinated solvent compounds, and chlorobenzenes. Remediation at the Site is complete. Remedial actions have achieved soil cleanup objectives for commercial use. Residual contamination in the soil and groundwater at the Site will be managed under the Site Management Plan. "

Health Problem: "To prevent exposures to contaminated groundwater at the site, the remedy includes a minimum five year groundwater monitoring program and environmental easements in place to prohibit use of groundwater."

The primary contaminants of concern at the Site include petroleum hydrocarbons (benzene, ethyl benzene, 1,2,4-trimethylbenzene, 1,3,5-trimethylbenzene, and xylenes), chlorinated solvent compounds (trichloroethene, dichloroethene, and vinyl chloride), chlorobenzenes, and metals (chromium, copper, mercury, nickel, and zinc). Exceedances of soil cleanup objectives include petroleum compounds, metals, and chlorobenzenes. Exceedances of the groundwater standards and guidance values included petroleum compounds, chlorinated solvent compounds, and chlorobenzenes. Remediation at the Site is complete. Remedial actions have achieved soil cleanup objectives for commercial use. Residual contamination in the soil and groundwater at the Site will be managed under the Site Management Plan. "

Health Problem: "To prevent exposures to contaminated groundwater at the site, the remedy includes a minimum five year groundwater monitoring program and environmental easements in place to prohibit use of groundwater."

Site Description: "Location: The Market Basket site is a 2.475-acre site located within the City of Geneva. The area surrounding the site is an urban area. The site is located approximately 0.18 miles west of the intersection of Gates Avenue and State Route 14. Site Features: The site is relatively flat and is covered with soil and gravel material. The site vacant and Gates Avenue divides the site into the northern (Parcel A) and southern (Parcel B) parcels. Current Zoning: The site is currently vacant and is zoned for industrial use. The surrounding parcels are currently used for a combination of commercial, light industrial, and residential. The nearest residential properties are located directly across from the site on the western side of Lehigh Avenue. Past Use of the Site: The Site has had various uses since 1900 to 1986. The uses at the Site included the Geneva Cutlery Company, Stearns Nursery, Inc., the Market Basket Corporation, general warehouse space, tool rentals and paint booth rental for do-it-yourself auto body repair. The Site has been vacant since 1986. Minimal environmental activities have been reported at the Site prior

to entering the Environmental Restoration Program. The City of Geneva Engineering Department inspected the Site February 1997 and noted approximately twenty 55-gallon drums and dozens of five-gallon containers of unknown origin or contents within the buildings and on the Site grounds. Some of the containers were reportedly in poor condition with evidence of leakage and the City of Geneva had the drums and containers removed for proper off-site disposal. The Site s buildings also had been significantly damaged and contained friable asbestos pipe insulation. The Geneva Fire Department in 1987 noted that the building was in a deplorable condition and a very definite fire hazard and the structural integrity of portions of the building (holes in the floors and collapsing ceilings and roof supports) pose a genuine threat to the lives of firefighters. The prior uses that potentially lead to the Site contamination include paint booth, automotive repairs, cutlery, and manufacturing. Site Geology and Hydrogeology: Fill material encountered at the site consists of sand, gravel, masonry materials, and cinders. The site s soils are primarily fine-grained sands with varying amounts of silt and clay. Bedrock was not encountered at the site. The depth to groundwater at the site ranges from 5 to 10 feet below the ground surface. The groundwater flow direction is in an easterly south eastern. "

Env Problem: "Nature and Extent: The nature and extent of contamination was defined under the remedial investigation. The primary contaminants of concern at the Site include petroleum hydrocarbons (benzene, ethyl benzene, 1,2,4-trimethylbenzene, 1,3,5-trimethylbenzene, and xylenes), chlorinated solvent compounds (trichloroethene, dichloroethene, and vinyl chloride), chlorobenzenes, and metals (chromium, copper, mercury, nickel, and zinc). Site Code: 57201

Site Description: "Location: The Market Basket site is a 2.475-acre site located within the City of Geneva. The area surrounding the site is an urban area. The site is located approximately 0.18 miles west of the intersection of Gates Avenue and State Route 14. Site Features: The site is relatively flat and is covered with soil and gravel material. The site vacant and Gates Avenue divides the site into the northern (Parcel A) and southern (Parcel B) parcels. Current Zoning: The site is currently vacant and is zoned for industrial use. The surrounding parcels are currently used for a combination of commercial, light industrial, and residential. The nearest residential properties are located directly across from the site on the western side of Lehigh Avenue. Past Use of the Site: The Site has had various uses since 1900 to 1986. The uses at the Site included the Geneva Cutlery Company, Stearns Nursery, Inc., the Market Basket Corporation, general warehouse space, tool rentals and paint booth rental for do-it-yourself auto body repair. The Site has been vacant since 1986. Minimal environmental activities have been reported at the Site prior to entering the Environmental Restoration Program. The City of Geneva Engineering Department inspected the Site February 1997 and noted approximately twenty 55-gallon drums and dozens of five-gallon containers of unknown origin or contents within the buildings and on the Site grounds. Some of the containers were reportedly in poor condition with evidence of leakage and the City of Geneva had the drums and containers removed for proper off-site disposal. The Site s buildings also had been significantly damaged and contained friable asbestos pipe insulation. The Geneva Fire Department in 1987 noted that the building was in a deplorable condition and a very definite fire hazard and the structural integrity of portions of the building (holes in the floors and collapsing ceilings and roof supports) pose a genuine threat to the lives of firefighters. The prior uses that potentially lead to the Site contamination include paint booth, automotive repairs, cutlery, and manufacturing. Site Geology and Hydrogeology: Fill material encountered at the site consists of sand, gravel, masonry materials, and cinders. The site s soils are primarily fine-grained sands with varying amounts of silt and clay. Bedrock was not encountered at the site. The depth to groundwater at the site ranges from 5 to 10 feet below the ground surface. The groundwater flow direction is in an easterly south eastern. "

Env Problem: "Nature and Extent: The nature and extent of contamination was defined under the remedial investigation. The primary contaminants of concern at the Site include petroleum hydrocarbons (benzene, ethyl benzene, 1,2,4-trimethylbenzene, 1,3,5-trimethylbenzene, and xylenes), chlorinated solvent compounds (trichloroethene, dichloroethene, and vinyl chloride), chlorobenzenes, and metals (chromium, copper, mercury, nickel, and zinc). Exceedances of soil cleanup objectives include petroleum compounds, metals, and chlorobenzenes. Exceedances of the groundwater standards and guidance values included petroleum compounds, chlorinated solvent compounds, and chlorobenzenes. Remediation at the Site is complete. Remedial actions have achieved soil cleanup objectives for commercial use. Residual contamination in the soil and groundwater at the Site will

Environmental Interest/Information System:

OSHA ESTABLISHMENT

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Tank Info:

Tank Number: 001
Tank Id: 149272
Material Code: 0008
Common Name of Substance: Diesel

Equipment Records:

B00 - Tank External Protection - None
C00 - Pipe Location - No Piping
D02 - Pipe Type - Galvanized Steel
F00 - Pipe External Protection - None
A00 - Tank Internal Protection - None
I00 - Overfill - None
H00 - Tank Leak Detection - None
J02 - Dispenser - Suction Dispenser
G00 - Tank Secondary Containment - None

Tank Location: Aboveground - contact with soil.... Tank bottom rests on soil, allowing no visual inspection.

Tank Type: Steel/Carbon Steel/Iron
Tank Status: Tank Converted to Non-Regulated Use
Pipe Model: Not reported
Install Date: 04/01/1984
Capacity Gallons: 5000
Tightness Test Method: NN
Date Test: Not reported
Next Test Date: Not reported
Date Tank Closed: 09/01/1992
Register: True

TAKEN OF PILE. 06/18/1993: MARCOR CONTINUING WORK. TRENCHING COMPLETE & WELLS CONNECTED. TRENCHES HAVE BEEN BACKFILLED. TO INSTALL CURB BOXES AROUND SOME OF THE MW-'S. EXCESS DIRT TO BE TAKEN TO SOIL PILE AT WASTE WATER TREATMENT PLANT AND AT THIS TIME TAKE SOIL SAMPLES FROM PILE. 08/31/1993: CH CHECKS SITE TO DETERMINE IF PRODUCT PUMPS ARE IN PLACE IN MW-2, MW-3 & MW-8. MW-2 & MW-3 HAVE CARS PARKED ON TOP OF MANWAYS RESTRICTING ACCESS. MW-8 DOES NOT HAVE A PUMP IN IT. IT APPEARS TO HAVE GASOLINE IN IT. THE AIR STRIPPER BLOWER IS OPERATING AT THE TIME OF MY VISIT. 05/17/1994: JM ON SITE W/MARCOR. DISCUSSED RECOVERY OPERATION. TECHNICIANS ADVISED OF MONITORING PROCEDURES. 08/18/1994: JM ON SITE W/MARCOR; VAPOR RECOVERY SYSTEM ON SITE AND BEING INSTALLED. VS REPRESENTATIVE INSTRUCTING MARCOR HOW TO START UP & OPERATE SYSTEM. SYSTEM TO BE OPERATING ON MONDAY. 09/13/1994: JM ON SITE W/PETE MILLER & ROBERT YARGER OF MARCOR. VR SYSTEM RUNNING NORMALLY. MARCOR TO COMPARE PROPANE USE AND SOIL GAS USE FOR VR SYSTEM. ALSO TO CHECK ON NATURAL GAS HOOK-UP FOR SYSTEM. 10/11/1994: JM ON SITE W/ROB YARGER & DOUG STAMP OF MARCOR; REPLACING 3/4 NATURAL GAS LINE THAT WAS RECENTLY INSTALLED WITH 2 NATURAL GAS LINE FOR V.R. SYSTEM. SYSTEM DOWN PRESENTLY TO BE BACK ON LINE 10/12. 02/07/1995: CH ON SITE W/MARCOR & EP&S TO LOOK AT THE V R SYSTEM; THE VR SYSTEM IS TO BE MOVED TO MAHONEY SITE ACROSS TOWN TO EVALUATE OFF GAS CONCENTRATIONS & WHAT TREATMENT TECHNOLOGY WILL BE NECESSARY. THE SYSTEM SEEMS TO BE OPERATING WELL & IS USING APPROX 3 CFM ALTERNATE FUEL. AT START OF PROJECT ALTERNATE FUEL CONSUMPTION WAS APPROX 1 CFM. MAX ALLOWABLE ALTERNATE FUEL CONSUMPTION IS ABOUT MOV.5.2 CFM. WE ALSO LOOK AT CHEMICAL TREATMENT OF RECOVERY WATER TO LIMIT MINERAL BUILDUP. SYSTEM OPERATING WELL. 03/29/1995: CH ON SITE; V.R.S. IS OPERATIONAL. ALL EQUIPMENT SEEMS TO BE OPERATING WELL. UNABLE TO TELL HOW MUCH ALTERNATE FUEL SYSTEM IS CONSUMING. 04/25/1995: CH ON SITE. VR SYSTEM IS OPERATIONAL. EFFICIENCY CANNOT BE CHECKED BECAUSE ON BOARD COMPUTER IS LOCKED BY CONTRACTOR WHO OWNS THE SYSTEM. SYSTEM SEEMS TO BE OPERATING WELL. 04/26/1995: MZ ON SITE TO CHECK V.E.S. SYSTEM APPEARED TO BE INSTALLED BUT WAS NOT OPERATING. 06/15/1995: P MILLER TELCON W/CHIEF DEBOLT; GENEVA FIRE DEPT, NEIGHBOR IMMEDIATELY WEST OF SITE DAVID LAVOIE (315-789-0800) CALLED COMPLAINING OF FUMES COMING FROM SITE. CONTACTED MARCOR TO CHECK OUT AS SOON AS POSSIBLE TO DETERMINE SOURCE OF FUMES. FUMES CAUSING CHILDREN OF LAVOIE TO HAVE SORE THROATS. 06/16/1995: PM TELCON W/JAN HAAG OF MARCOR; CHECKED OUT SOURCE OF ODORS. SEEMS TO BE COMING FROM AIR STRIPPER AS PUMP IN MW-8 PUMPED SOME PRODUCT INTO STRIPPER. CH ON SITE; VR SYSTEM AND OTHER RECOVERY AND TREATMENT SYSTEMS SEEM TO BE OPERATING WELL. 12/13/1996: RECEIVED NOTICE OF LIEN AGAINST DAVE'S SERVICE, 1 NORTH EXCHANGE ST. FOR ENVIRONMENTAL CLEANUP COSTS. 03/28/2000: PM, JM & BF MEET WITH CHRIS CRANMER OF MARCOR TO DISCUSS SITE STATUS. MARCOR TO DEVELOP SITE CONCEPTUAL MODEL AND SAMPLE FOR HETEROTROPHIC BACTERIA TO DETERMINE IF THERE IS A VIABLE POPULATION FOR HYDROCARBON DEGRADATION. MARCOR ALSO TO DEVELOP PROPOSAL FOR SPARGE EXTRACTION SYSTEM. 03/13/2002: JM MET GES ON SITE. CKED MONITORING WELLS, MW18, MW19, MW20, MW21. SAMPLED THESE WELLS. SOME PRODUCT PRESENT IN MW18. ONCE SAMPLED, GAVE SAMPLE JARS TO LOZIER LABS FOR ANALYSIS. 06/05/2007: THE DEPT MEETS TODAY WITH KINYORDA FOGLEMAN OF SUNOCO AND THEIR CONSULTANTS TO DISCUSS ACTIVE REGION 8 SPILLS. LITIGATION BETWEEN DAVE'S SERVICE AND SUNOCO IS FINALIZED. SUNOCO WILL BE TAKING OVER THE REMEDIATION. CASE WAS SETTLED IN DEC 06. SUNOCO IS WAITING FOR THE SETTLEMENT PAPERWORK. SUNOCO PLANS TO DO SITE CHARACTERIZATION AND PILOT TESTING AT DAVE'S THIS YEAR. THEY BELIEVE THEY WILL MOST LIKELY GO WITH O2 AS THE REMEDIAL TECHNIQUE BASED ON

S105054417

THE PILOT TEST PERFORMED AT THE SUNOCO SITE ACROSS THE STREET. 01/19/2012: THE DEPT MEETS WITH SUNOCO AND IT'S CONTRACTOR TO REVIEW ACTIVE R8 SUNOCO SPILLS. MATRIX WAS GRANTED ACCESS TO THE SITE LAST NOV. THEY FEEL THEY HAVE THE SITE WELL CHARACTERIZED. THERE HAS BEEN A TRACE OF FREE PRODUCT IN B6/MW201. CONCENTRATIONS AT LAST SAMPLING WERE 1,291,590PPB. THEY SAMPLED THE NEW WELLS AND OLD WELLS AFTER ALL WERE DEVELOPED. OLD WELLS WERE VERY PLUGGED WITH ORGANICS AND OTHER DEBRIS INCLUDING OLD FINES. MATRIX SAYS RESULTS FROM OLD WELLS WERE MUCH LOWER THAN THE NEW WELLS WHICH WERE ADJACENT TO THEM. THIS MAY INDICATE THAT FORMER RECOVERY SYSTEM CLEANED AREA CLOSE TO OLD WELLS BUT RADIUS OF INFLUENCE WAS MINIMAL. 06/12 SITE CHARACTERIZATION REPORT (06/04/12) RECEIVED INDICATING SIGNIFICANT GW CONTAMINATION REMAINING AT SITE, MATRIX DEVELOPING REMEDIATION PLAN UTILIZING AEROBIC BIOREMEDIATION TECHNOLOGY. 01/07/2016: SUNOCO (MATRIX) CONDUCTED LARGE EXCAVATION OF CONTAMINATED SOIL IN 2013. CONFIRMATORY SAMPLING OF SIDEWALLS INDICATE SIGNIFICANT LEVELS OF VOCs REMAIN IN SOILS. EXCAVATIONS WERE COMPLETED TO THE EXTENT PRACTICABLE USING SHEET PILING TO KEEP EXCAVATIONS OPEN. REQUESTING A SOIL AND GROUNDWATER MANAGEMENT PLAN FROM SUNOCO. SOIL AND GROUNDWATER MANAGEMENT PLAN SUBMITTED BY MATRIX ENVIRONMENTAL. NO FURTHER ACTION LETTER SENT 08/25/2017. 08/03/2020: FINAL ISR SUBMITTED TO ALBANY. NO FURTHER ACTIONS REQUIRED BY SPILLS UNIT."

Remarks:

"CARL BORKLAND OF SUN DOES NOT THINK CONTAMINATION AT A+ MINIMART ACROSS NORTH ST IS RESPONSIBLE FOR ALL CONTAMINATION. SOIL VAPOR SURVEY PERFORMED ON -05-03-90. SEE SPILL #8804294."

MILLER SENT LETTER TO CARL BORKLAND-SUN REFINING, REQUESTING SYSTEM TEST, INVESTIGATION FOR BETTER PLUME DEFINITION AND INSTALLATION OF ADDITIONAL RECOVERY WELL. 01/30/90: GENEVA FIRE DEPT. INVESTIGATING CAUSE OF EXPLOSION IN RECOVERY WELLS THAT CAUSED MANHOLE COVERS TO FLIP OVER. CHIEF DEBOLT INVESTIGATING, SUSPECTS DEFECTIVE HEAT TAPE. 01/31/90: P. MILLER ON SITE WITH CHIEF DEBOLT, LARRY MARTIN-POLLUTION ENTERPRISES, JACK CRANDALL. SEVERAL CITIZENS UPSET ABOUT EXPLOSION. PLAN TOWN MEETING TO EXPLAIN RECOVERY OPERATIONS. 02/05/90: P. MILLER TELEPHONE CONVERSATION WITH CHIEF DEBOLT, INFORMATIONAL TOWN MEETING PLANNED FOR 2/12/90. 02/05/90: CURRENT PRODUCT RECOVERY IS ABOUT 8,000 GALLONS. 02/26/90: P. MILLER ON SITE. WITNESSED INSTALLATION OF NEW RECOVERY WELL. 04/24/90: P. MILLER TELCON W/LARRY MARTIN-POLLUTION ENTERPRISES. FOUR NEW MONITORING WELLS HAVE BEEN INSTALLED. TWO WELLS SHOW TRACE OF PRODUCT. 04/24/90: DEC APPROVAL HAS BEEN GRANTED TO REMOVE CONTAMINATED SOIL AND SHOULD BE REMOVED THIS WEEK. 05/03/90: P. MILLER & J. MARCHITELL ON SITE W/MARCOR TO PERFORM SOIL VAPOR SURVEY. CONTAMINATED SOIL STILL ON SITE AT A+MINIMART. 05/10/90: P. MILLER TELCON W/LARRY MARTIN - POLLUTION ENTERPRISES. RECOVERY WELL (WELL #13) IS OUT OF COMMISSION SINCE 04-26-90. SHOULD BE BACK RUNNING AGAIN 05-11-90. NEW RECOVERY WELL (#14) SHOWING SHEEN. 05/10/90: ONLY SIGNIFICANT CHANGE IS WELL #10, WHICH HAS CLOSE TO 1/2 FOOT PRODUCT. 06/18/90: P. MILLER TELCON W/ROGER MILLERD 315-548-9628, BUSINESS ASSOC OF DAVE PASSALAQUA. REQUESTS COPY OF SOIL GAS SURVEY. CONTACTED MARCOR, WILL SEND COPY TO D. PASSALAQUA. 07/02/90: P. MILLER RECEIVED FROM MCGOWAN & BROWNELL-ATTORNEYS & COUNSELORS AT LAW FOR MR. BERNARD GOEBERT REFUSES TO INSTALL WELL REQUESTED IN LETTER OF JUNE 1, 1990. 07/06/90: P. MILLER TELCON W/CARL BORKLAND-SUN, GES (GROUNDWATER & ENVIRON SERV) IS TAKING OVER REMEDIATION OF GENEVA SITE. BOB KOSLAWSKI, PRIN HYDROGEOLOGIST IS CONTACT 315-964-1203. 07/06/90: P. MILLER TELCON W/CARL BORKLAND. ORIGINAL RECOVERY WELL IS PUMPING AT 1/2 GPM W/INFLUENT CONCENTRATION OF 80 PPM TO STRIPPER. NEW RECOVERY WELL IS PUMPING AT ABOUT 4.5 GPM.

07/06/90: SUN IS CONSIDERING INSTALLING TRENCH ALONG PROPERTY LINE TO INCREASE YIELD & PREVENT FURTHER MIGRATION OF PRODUCT FROM PROPERTY. SUNS PAYS CITY OF GENEVA ABOUT \$.05/GAL TO DISCHARGE TO SANITARY. 07/06/90: SUN HAS PAID CITY OF GENEVA \$140,000 FOR DISCHARGE TO DATE. THEY WANT TO DISCHARGE TO STORM SEWER AND WILL OBTAIN SPDES PERMIT IF NECESSARY. 07/09/90: P. MILLER RECEIVED FROM DAVID PASSALACQUA LETTER OF REFUSAL TO DO GROUNDWATER INVESTIGATION REQUESTED IN LETTER OF JUNE 16, 1990. 07/11/90: RECEIVED DEPOSITION BY MR. ANTHONY RAO-FORMER OWNER OF DAVE'S SERVICE. MR. RAGO INDICATES CONTAMINATION LEFT IN GROUND WHEN TANKS REPLACED BY SUN. FORWARDED INFORMATION TO CARL BORKLAND OF SUN. 08/01/90: P. MILLER & J. MARCHITELL ON SITE W/MARCOR, PERFORMING GROUND PENETRATING RADAR SURVEY NEAR NORTH POLE ICE CREAM STAND. GPR DID NOT INDICATE EXISTANCE OF BURIED TANKS IN PARKING LOT. 08/06/90: P. MILLER W/NICOLE FATHERLY-GES, SUN TO APPLY FOR SPDES TO DISCHARGE TO STORM SEWER. RECOVERY IS CURRENTLY ONLY BY MANUAL BAILING, PRODUCT PUMPS ARE IN NEED OF REPAIR. 08/14/90: P. MILLER TELCON W/CARL BORKLAND-SUN OIL. MR BORKLAND ATTEMPTED TO SEARCH SUN'S FILES REGARDING LEAKING TANKS AT DAVE'S SERVICE WHEN OWNED BY SUN. COULD FIND NO INFO OTHER THAN MENTION OF FIRE DEPT. 08/14/90: FIRE DEPT PERFORMED AIR TEST ON TANKS AND TANKS FAILED. SUN TAKES POSITION CONTAMINATION AT DAVE'S IS NOT CAUSED BY SUN. CARL BORKLAND WILL FOLLOW W/LETTER. 08/14/90: P. MILLER TELCON W/CHIEF DEBOLT. HE WILL SEARCH FILES TO TRY AND FIND RECORDS OF TANK TEST BY DEPT PRIOR TO TRANSFER OF OWNERSHIP OF SUNOCO STATION TO DAVE PASSALACQUA. 08/14/90: DAVE'S SERVICE CENTER WAS PAT'S SUNOCO PRIOR TO TRANSFER OF OWNERSHIP. 08/14/90: OPENED SEPARATE SPILL NUMBER FOR CONTAMINATION ON DAVE'S SERVICE CENTER. SEE SPILL #9005353 FOR MORE INFORMATION. 02/14/91: P. MILLER TECON W/CARL BORKLAND-SUN, 6 SCREEN TO BE INSTALLED IN RW-1 INSIDE 8 SCREEN AND NEW FILTER PACK PLACED AROUND SCREEN IN AN ATTEMPT TO STOP INFLUX OF SILT. DISTANCE-DRAWDOWN PUMP TEST PLAN. 02/14/91: NED FOR RW-2 IN NEAR FUTURE. ANALYSIS OF PRODUCT REVEALED LEADED GASOLINE (7.05 GRAMS/GALLON) ON TESTED WELLS. SOME WELLS HAD SMALL AMOUNTS MTBE; HOWEVER, MW-18 HAD NO MTBE. 04/24/91: P. MILLER, B FINSTER ON SITE WITH REPS OF SUN, CITY OF GENEVA TO DISCUSS EMERGENCY MEASURES TO BE INITIATED TO CONTROL CONTAMINANT PLUME. 11/14/91: SUN & GES WILL MEET 11-26-91 TO DISCUSS FUTURE REMEDIAL PLANS FOR SITE. FOLLOWING MEETING WILL INFORM NYSDEC OF WORKPLAN. 02/14/92: P MILLER TELCON W/TROY CARRINGTON OF G.E.S. 4 NEW WELLS INSTALLED ON SITE. WATER QUALITY IN WELLS TO BE DETERMINED. INFO TO BE REPORTED IN NEXT SITE UPDATE. 03/30/92: FINSTER & MILLER MEET W/CHIEF RALPH DEBOLT, GENEVA FIRE DEPT, MAYOR OF GENEVA, SEVERAL GENEVA COUNCILMEN, GENEVA CITY MGR & CITIZENS OF NORTH & EXCHANGE ST AREA TO DISCUSS THE NEED FOR WET TRAPS ... 03/30/92: ...IN THE HOMES OF THE AREA NECESSARY TO PREVENT GASOLINE AND OTHER SEWER GASES FROM MIGRATING INTO AREA HOMES. 05/26/92: P MILLER TELCON WITH JIM OPPENHEIM. 3 NEW WELLS INSTALLED; 2 WITH HIGH DISSOLVED. 07/23/92: P MILLER TELCON W/JIM OPPENHEIM; TO PERFORM LIQUID RING VACUUM TEST TO DETERMINE FEASIBILITY. 06/09/93: RECEIVED SITE REPORT FROM G.E.S. FOR APRIL 1993; APPROX 9,772 GALLONS RECOVERED FROM SITE TO DATE. APPROX 35 GAL RECOVERED DURING APRIL. 06/10/93: P MILLER TELCON W/JIM OPPENHEIM OF SUN; V R SYSTEM ON SITE AND IS RUNNING. PRELIMINARY RESULTS ARE FAVORABLE. 06/15/93: P MILLER & C HETTENBAUGH ON SITE; MEET DON & TIM OF G.E.S. WHO SHOW US V.R. SYSTEM NEWLY INSTALLED ON SITE. EARLY INDICATION ARE THAT PRODUCT RECOVERY IS GREATLY ENHANCED. 07/20/93: P MILLER MET W/J OPPENHEIM OF SUN; VAPOR RECOVERY SYSTEM RECOVERED 1679 GALLONS OF VAPOR PHSE PRODUCT EQUIVALENT DURING JUNE 1993. 08/31/93: CH ON SITE. VR SYSTEM IS UP AND RUNNING. THE VACUUM

IS BEING PULLED ON RW-2 ONLY. THE VALVES TO RW-1 & RW-3 ARE BOTH CLOSED. 10/04/93: RECEIVED FROM G.E.S. A JULY & AUGUST MONITORING REPORT. V.R. SYSTEM HAS RECOVERED THE EQUIVALENT OF 3265 GALLONS OF GASOLINE SINCE COMMENCEMENT OF OPERATIONS IN JUNE. 12/21/93: APPROX 4500 GAL OF PRODUCT REMOVED BY VR SYSTEM JUNE 1993 THRU OCT 1993. TOTAL PRODUCT RECOVERED FROM SITE VAPOR & LIQUID PHASE SINCE INCEPTION OF REMEDIATION APPROX 14,000 GAL. 04/05/94: P MILLER TELCON W/JIM OPPENHEIM OF SUN; WILL CONDUCT RECOVERY/VENT TEST ON MW-18. P MILLER TELCON W/BOB RUSSO OF GES 315-452-5700; G.E.S. WILL USE VR SYSTEM TO CONDUCT TEST ON MW-18. SCHEDULED ASAP. 04/15/94: G.E.S. ON SITE WORKING ON V.R.S. VRS HAS NOT BEEN WORKING PROPERLY FOR THE LAST MONTH. THE PROBLEM IS FROM A COMPUTER MALFUNCTION. THE COMPUTER PROGRAM HAS TO BE RETURNED TO CALIFORNIA FOR REPAIR. 04/15/94: PUMP AND TREAT SYSTEM IS STILL OPERATING AT THE SITE. 03/21/95: CH ON SITE. GES & NOTHNAGLE ARE ON SITE INSTALLING 45 NEW WELLS FOR HIGH VACUUM VAPOR EXTRACTION. 35 WELLS COMPLETED. TRENCHING TO BE PERFORMED THE WEEK OF 03-27-95. PRIOR WELLS WERE NOT DESIGNED... 03/21/95: ...FOR VAPOR EXTRACTION AND WERE TOO FAR APART. 45 WELLS WERE OVERLAPPED WITH 15 FT RADIUS OF INFLUENCE. 03/30/95: RECEIVED FROM GES THE REMEDIAL ACTION PLAN. PLAN TO INSTALL 45 TOTAL PHASE EXTRACTION WELLS TO INCREASE REMEDIATION. WORK IS CURRENTLY UNDERWAY. 03/31/95: RECEIVED FROM GES JAN 95 SITE MONITORING REPORT. APPROXIMATELY 18,700 GALLONS OF PRODUCT REMOVED THOUGH JAN 95 VIA LIQUID & VAPOR PHASE EXTRACTION. 04/18/95: MILLER TELCON W/ANNEMARIE KEARNS OF GES 315-452-5700. 44 NEW WELLS INSTALLED; PIPING CURRENTLY BEING INSTALLED. APPROX 3 EXTRACTION WELLS PER RUN. SYSTEM WILL BE TOTAL PHASE EXTRACTION USING ... 04/18/95: ...VR SYSTEM FOR VACUUM. WELLS OUTFITTED W/DROP TUBES TO ALLOW FOR ADJUSTMENT OF THE DEPTH OF EXTRACTION IN EACH WELL. DRILLING OF WELLS INDICATED SATURATED ZONE THINS OUT TO THE SOUTHEAST. 04/18/95: INSTALLATION WORK EXPECTED TO BE COMPLETED BY THE WEEK OF 04-24-95. 09/28/95: This is additional information about material spilled from the translation of the old spill file: REG & UNLEADED GAS. 08/06/96 RECEIVED QUARTERLY MONITORING REPORT, TOTAL PHASE SYTEM HAS RECOVERED 54,592 LBS OF GASOLINE TO DATE. SEPARATE PHASE PRODUCT RECOVERED TOTALS 9837.75 GALLONS. 4,035,960 GALLONS OF WATER GROUNDWATER PUMPED TO DATE. MW18 STILL SHOWS ABOUT .3 FEET OF PRODUCT. 08/07/96 PM MET WITH DAVE BENDER-SUN, DISCUSSED INCLUDING MW18 IN REMEDIATION. DECISION TO BE MADE FOLLOWING LETTER FROM DEC. 10/31/96 RECEIVED SITE REPORT FROM GES, 59,576 LBS OF PRODUCT REMOVED VIA HI-VAC SYSTEM. 9,838 GALLONS OF FREE PRODUCT RECOVERED. 07/02/1999: RECEIVED REPORT FROM GES, VP-26 SHOWS HIGHEST CONTAMINATION CONCENTRATIONS OF 51,000 PPB BTEX AND 40,000 PPB MTBE. TOTAL PHASE EXTRACTION SYSTEM HAS REMOVED ABOUT 2,208 POUNDS OF VAPOR PHASE HYDROCARBONS SINCE JANUARY 1999. 04/05/00: CH MEETING WITH BENDER. HIGH VAC CONTINUES TO OPERATE. SITE CONTINUES TO IMPROVE. OLD PUMP ISLAND AND CONTAMINATED SOIL AROUND THEM WAS REMOVED IN OCT.99. THIS SEEMED TO BE THE SOURCE AREA AND CONDITIONS CONTINUE TO IMPROVE. 11/01/01: CH HAS MEETING WITH DAVE BENDER OF SUN TO REVIEW ALL OF SUN'S ACTIVE REGIONAL SPILLS. REMEDIATION TO CONTINUE AS IS. BTEX LEVELS SLOWLY GOING DOWN. 06/07/06: THE DEPT MEETS WITH KINYORDA FOGLEMAN OF SUNOCO AND THEIR CONTRACTORS TO DISCUSS ACTIVE REGION 8 SPILLS. IT IS DISCOVERED THAT MOST OF THE RECENT YEARS NOTES WERE RECORDED IN SPILL #9205083. REFER TO THIS SPILL FOR MORE RECENT INFORMATION. THE 92 SPILL HAS BEEN CLOSED AND ALL FOLLOWUP WILL BE RECORDED UNDER THIS 88 SPILL. IN DECEMBER 2005 MATRIX INSTALLED 17 SOIL BORINGS TO EVALUATE SOIL CONDITIONS. GROUNDWATER SAMPLES WERE TAKEN FROM THE OPEN BORING HOLE

S100491508

TO GET A ROUGH IDEA ON GROUNDWATER CONDITIONS. FROM THE INFORMATION GATHERED IN THE BORINGS, SEVEN(7) FOUR(4) INCH MONITORING WELLS WERE INSTALLED IN FEB 06. THE NEW WELLS WERE SAMPLED IN MARCH 06. OFF SITE WELL MW-18 HAD A VAC EVENT WHERE 2500 GALLONS OF WATER WAS REMOVED FROM THE WELL. AFTER THIS VAC EVENT CONCENTRATIONS REBOUNDED. MATRIX BELIEVES BECAUSE THERE WAS ONCE FREE PRODUCT IN THIS WELL THAT SAND PACK IS SMEARED AND CONTAMINATED. THEY PLAN ON ABANDONING THE WELL AND INSTALLING A NEW ONE WITH SAME CONSTRUCTION. A REMEDIAL ACTION PLAN WILL BE DEVELOPED WHEN ACCESS TO DAVE'S SUNOCO PROPERTY IS GRANTED. SUNOCO HAS LOST IT'S COURT BATTLE AND HAS BEEN FOUND TO BE RESPONSIBLE FOR THE SPILL AT DAVE'S SUNOCO ALSO. A REMEDIAL SYSTEM TO ADDRESS BOTH SITES WILL BE DEVELOPED. ALSO THE FORMER KENTUCKY FRIED CHICKEN ACROSS THE STREET TO THE EAST HAS BEEN RAZED. THE ENTIRE SITE IS VACANT AS OF THIS WEEK. A NEW STRUCTURE IS TO BE BUILT ON THE SITE FOR A VIDEO STORE(?) 06/05/07: THE DEPT MEETS TODAY WITH KINYORDA FOGLEMAN OF SUNOCO AND THEIR CONSULTANTS TO DISCUSS ACTIVE REGION 8 SPILLS. PILOT TESTING COMPLETED IN THE FALL OF 2006. O2 INJECTION WILL BE THE REMEDIAL TECHNIQUE USED TO COMPLETE THE REMEDIATION AT THE SITE. WORK WILL MOST LIKELY TAKE PLACE AFTER CHARACTERIZATION AND PILOT TEST ARE COMPLETED AT DAVE'S SUNOCO. REMEDIAL SYSTEM INSTALLS WILL MOST LIKELY TAKE PLACE AT THE SAME TIME AT BOTH SITES. 10/18/07 THIRD QUARTER 07 SITE STATUS REPORT RECEIVED FROM MATRIX ENVIRONMENTAL. 01/21/08 REMEDIAL ACTION PLAN RECEIVED FROM MATRIX ENVIRONMENTAL. 01/25/08 FOURTH QUARTER 07 SITE STATUS REPORT RECEIVED FROM MATRIX ENVIRONMENTAL. 03/21/08 FIRST QUARTER 08 SITE STATUS REPORT RECEIVED FROM MATRIX ENVIRONMENTAL. NOTICE OF WORK LETTER RECEIVED FROM MATRIX. 07/08/08 SECOND QUARTER 08 SITE STATUS REPORT RECEIVED FROM MATRIX ENVIRONMENTAL. 10/30/08 THIRD QUARTER 08 SITE STATUS REPORT RECEIVED FROM MATRIX ENVIRONMENTAL. 02/13/09 FOURTH QUARTER 08 SITE STATUS REPORT RECEIVED FROM MATRIX ENVIRONMENTAL. 03/31/09 SITE STATUS REPORT RECEIVED FROM MATRIX ENVIRONMENTAL. RECENT SAMPLING SHOWS GOOD PROGRESS IN REMEDIATION AT SITE. A SITE CLOSURE REQUEST MAY BE POSSIBLE SOON. BEFORE SUNOCO CAN REQUEST CLOSURE THEY NEED INFORMATION FROM ACROSS THE STREET. THEY HAVE NOT HAD ANY DATA FROM DAVE PASSALAQUA SITE SINCE 2005. THEY WOULD LIKE TO GET SITE ACCESS TO ALLOW THEM TO SAMPLE THE SITE AND DETERMINE IF THERE IS ANY CLEANUP NECESSARY THERE. THEY FEAR PULLING CONTAMINANTS FROM PASSALAQUA SITE ACROSS TO THE 14 EXCHANGE SITE. PETE MILLER TO CONTACT AG S OFFICE TO CHECK ON SITE STATUS AND SEE IF ACCESS CAN BE GRANTED. 01/19/12: THE DEPT MEETS WITH SUNOCO AND IT'S CONTRACTORS TO DISCUSS OPEN R8 SITES. MW-102 IS STILL HOT WITH CONCENTRATIONS AT 5 PPM. MW-107 AT 1.1PPM. MOST OTHER WELLS HAVE STAYED DOWN. THE SECTION OF THE SYSTEM OUT NEAR EXCHANGE WAS SHUT DOWN APPROX ONE YEAR AGO. AFTER THAT THEY SAW A REBOUND IN 103 AND 106 SO THE SYSTEM WAS STARTED AGAIN AND RUN ON PULSE. IN LATE NOV MATRIX INJECTED BIO ENHANCING AGENTS IN OFF SITE WELL 102. THEY PLAN TO RUN O2 UNTIL THE END OF JUNE 2012 THEN THEY WILL EVALUATE SITE. SOIL AND GROUNDWATER MANAGEMENT PLAN SUBMITTED BY MATRIX ENVIRONMENTAL. NO FURTHER ACTION LETTER SENT 08/25/2017."

Remarks:

"TWO TANKS, ONE REGULAR AND ONE UNLEADED. AIR TESTED LINE AND THEY FAILED. JOHN MALINOSKI, CONTACT."

[Click Here for FRS Facility Detail Report:](#)

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Site Description: "Location: The former foundry consists of two parcels located on approximately 2.5 acres at 23 Jackson Street and 44 Jackson Street in a mixed urban residential/commercial neighborhood. Site Features: The former foundry buildings were removed and the building slabs were removed after remediation as part of the Site Re-grading Plan. Current Zoning and Land Use: The site is currently inactive and is zoned commercial/industrial. A railroad and commercial property borders the site to the south and west with an automotive repair garage and residential properties to the east and north. Past Use of the Site: A foundry was present at the site since the late 1800s and part of the site was a coal yard until expansion of the foundry in the 1940s. Foundry operations ceased in 1988. The Department completed a preliminary environmental investigation of the site in

1995. The results identified some areas of metals contamination in site soils. Based on these results the City of Geneva entered the Environmental Restoration Program in 1998 and the Brownfield Clean-Up Program in 2017. Operable Units: The site was divided into three operable units. An operable unit represents a portion of a remedial program for a site that for technical or administrative reasons can be addressed separately to investigate, eliminate or mitigate a release, threat of release or exposure pathway resulting from the site contamination. Operable Unit 1 (OU 01) is the on-site parcel located south of Jackson Street and identified as 23 Jackson Street (104.8-1-34). OU 01 was the primary area for past industrial operations. OU 02 is the on-site parcel located north of Jackson Street and identified 44 Jackson Street (104.8-1-50). OU 2 included a warehouse and other foundry support operations. OU 03 consists of off-site areas impacted by contaminant deposition related to historical air emissions from the foundry. See site #C835027A for additional information about OU3. Site Geology: The site is underlain by fine to medium sand. Groundwater occurs at about 8 feet and flows southward. "

Env Problem: "Nature and Extent of Contamination: Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were heavy metals and polycyclic aromatic hydrocarbons (PAH's) in soil. Remedial actions have successfully achieved soil cleanup objectives for restricted residential use in the surface soil. Remaining contamination in the soil is being managed under a Site Management Plan."

Health Problem: "Measures are in place to control the potential for coming in contact with subsurface soil and groundwater contamination remaining on the site. Contaminated groundwater at the site is not used for drinking or other purposes and the site is served by a public water supply that obtains water from a different source not affected by this contamination."

Site Code: 535632
Control Name: Ground Water Use Restriction
HW Code: C835027
Control Code: 08
Control Type: INST
Dt record added: 12/11/2018
Dt rec updated: 11/03/2022
Updated By: ATMORGAN
Site Code: 535632
Site Description:

"Location: The former foundry consists of two parcels located on approximately 2.5 acres at 23 Jackson Street and 44 Jackson Street in a mixed urban residential/commercial neighborhood. Site Features: The former foundry buildings were removed and the building slabs were removed after remediation as part of the Site Re-grading Plan. Current Zoning and Land Use: The site is currently inactive and is zoned commercial/industrial. A railroad and commercial property borders the site to the south and west with an automotive repair garage and residential properties to the east and north. Past Use of the Site: A foundry was present at the site since the late 1800s and part of the site was a coal yard until expansion of the foundry in the 1940s. Foundry operations ceased in 1988. The Department completed a preliminary environmental investigation of the site in 1995. The results identified some areas of metals contamination in site soils. Based on these results the City of Geneva entered the Environmental Restoration Program in 1998 and the Brownfield Clean-Up Program in 2017. Operable Units: The site was divided into three operable units. An operable unit represents a portion of a remedial program for a site that for technical or administrative reasons can be addressed separately to investigate, eliminate or mitigate a release, threat of release or exposure pathway resulting from the site contamination. Operable Unit 1 (OU 01) is the on-site parcel located south of Jackson Street and identified as 23 Jackson Street (104.8-1-34). OU 01 was the primary area for past industrial operations. OU 02 is the on-site parcel located north of Jackson Street and identified 44 Jackson Street (104.8-1-50). OU 2 included a warehouse and other foundry support operations. OU 03 consists of off-site areas impacted by contaminant deposition related to historical air emissions from the foundry. See site #C835027A for additional information about OU3. Site Geology: The site is underlain by fine to medium sand. Groundwater occurs at about 8 feet and flows

southward. "

Env Problem: "Nature and Extent of Contamination: Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were heavy metals and polycyclic aromatic hydrocarbons (PAH's) in soil. Remedial actions have successfully achieved soil cleanup objectives for restricted residential use in the surface soil. Remaining contamination in the soil is being managed under a Site Management Plan."

Health Problem: "Measures are in place to control the potential for coming in contact with subsurface soil and groundwater contamination remaining on the site. Contaminated groundwater at the site is not used for drinking or other purposes and the site is served by a public water supply that obtains water from a different source not affected by this contamination."

City,State,Zip: GENEVA, NY 14456
Site Code: 57202
Program: ERP
HW Code: B00019
Site Class: N
Class N: N
SWIS: 3505
Region: 8
Town: Geneva (c)
Acres: 2.500
Record Added: 10/28/2003
Record Updated: 03/09/2017
Updated By: BXANDERS
Site Description: "Location: The former foundry is located on 2.5 acres at 23 Jackson Street in a mixed urban residential/commercial neighborhood. Site Features: The former foundry buildings were removed; only the slabs and foundations remain. Current Zoning and Land Use: The site is currently inactive and is zoned commercial/industrial. A railroad and commercial property borders the site to the south and west with an automotive repair garage and residential properties to the east and north. Past Use of the Site: A foundry was present at the site since the late 1800s and part of the site was a coal yard until expansion of the foundry in the 1940s. Foundry operations ceased in 1988. The Department completed a preliminary environmental investigation of the site in 1995. The results identified some areas of metals contamination in site soils. Based on these results the City of Geneva entered the Environmental Restoration Program in 1999. Operable Units: The site was divided into three operable units. An operable unit represents a portion of a remedial program for a site that for technical or administrative reasons can be addressed separately to investigate, eliminate or mitigate a release, threat of release or exposure pathway resulting from the site contamination. Operable Unit 1 (OU 01) is the on-site parcel located south of Jackson Street and identified as 23 Jackson Street (104.8-1-34). OU 01 was the primary area for past industrial operations. OU 02 is the on-site parcel located north of Jackson Street and identified 44 Jackson Street (104.8-1-50). OU 02 included a warehouse and other foundry support operations. OU 03 consists of off-site areas impacted by contaminant deposition related to historical air emissions from the foundry. Site Geology: The site is underlain by fine to medium sand. Groundwater occurs at about 8 feet and flows toward the southwest. "
Env Problem: "Nature and Extent of Contamination OU 01: 23 Jackson St. (On-Site Area South of Jackson Street) Soil was analyzed for volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), metals, and polychlorinated biphenyls (PCBs). Groundwater was analyzed for VOCs, SVOCs, and metals. Based upon investigations conducted to date, the primary contaminants of concern for OU 01 include mercury, chromium, lead, and polycyclic aromatic hydrocarbons (PAHs). PAHs are a category of SVOCs. Soil- PAHs are found in shallow soil (upper two

feet) at three locations: near a filled pit in the northwest section of OU 01; near a former sump in the southeast section of OU 01, and near a former machine shop in the southernmost section of OU 1. Mercury is intermixed with the PAHs near the filled pit. Chromium and lead are intermixed with the PAHs near the former sump. Concentrations of the PAHs benz(a)anthracene (up to 4.9 parts per million (ppm)), benzo(a)pyrene (up to 5.4 ppm), and benzo(b)fluoranthene (up to 8 ppm) exceed the soil cleanup objective (SCO) for unrestricted use and restricted residential use (both 1 ppm). Mercury (1.2 ppm) exceeds the SCO for unrestricted use (0.18 ppm) and restricted residential use (0.81 ppm). Lead (590 ppm) exceeds the SCO for unrestricted use (64 ppm) and restricted residential use (400 ppm). Chromium (70 ppm) exceeds the SCO for unrestricted use (30 ppm), but not restricted residential use (180 ppm). Off-site impacts are discussed under OU 3. Groundwater- The investigation did not identify any impacts to groundwater from OU 01. OU 02: 44 Jackson St. (On-Site Area North of Jackson Street) Soil and groundwater were analyzed for VOCs, SVOCs, and metals. Based upon investigations conducted to date, the primary contaminants of concern for OU 02 are chromium and mercury. Soil- Mercury is found in shallow soil (upper two feet) in the southeast section of OU 02. The concentration of mercury (1 ppm) exceeds the SCO for unrestricted use (0.18 ppm) and restricted residential use (0.81 ppm). Chromium (95 ppm) exceeds the SCO for unrestricted use (30 ppm), but not restricted residential use (180 ppm). Groundwater- The investigation did not identify any impacts to groundwater from OU 02. OU 03: Off-Site Soil Surface soil samples were collected on residential and commercial properties and analyzed for metals. The primary contaminants of concern for OU 03 are lead and arsenic. Soil Lead and arsenic associated with deposition of particulate matter from air emissions at the foundry are found in surface soil in the surrounding area extending up to approximately 1,300 feet from the site. Concentrations of lead found in off-site soil ranged from 12 to 6,380 ppm, compared to the residential use SCO of 400 ppm. Concentrations of arsenic found in off-site soil ranged from 0.9 to 228 ppm, compared to the residential use SCO of 16 ppm. Other sources of lead and arsenic that are not site-related (lead based paint, coal ash and other fill, other industrial operations, etc.) also contribute to off-site lead and arsenic concentrations. "

Health Problem: "The site is not fenced and people who enter the site (Operable Units 1 and 2) could contact contaminants in the soil by walking on the soil, digging, or otherwise disturbing the soil. People may also contact site-related contaminants in soils in off-site areas surrounding the site (Operable Unit 3). There is the potential for direct contact, incidental inhalation, or ingestion of dust containing site-related contaminants by digging or otherwise disturbing the soil both on and off-site. People are not drinking contaminated groundwater associated with the site because the area is served by a public water supply that is not affected by this contamination. "

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of state and tribal voluntary cleanup sites

VCP: Voluntary Cleanup Agreements

New York established its Voluntary Cleanup Program (VCP) to address the environmental, legal and financial barriers that often hinder the redevelopment and reuse of contaminated properties. The Voluntary Cleanup Program was developed to enhance private sector cleanup of brownfields by enabling parties to remediate sites using private rather than public funds and to reduce the development pressures on "greenfield" sites.

ERP: Environmental Restoration Program Listing

In an effort to spur the cleanup and redevelopment of brownfields, New Yorkers approved a \$200 million Environmental Restoration or Brownfields Fund as part of the \$1.75 billion Clean Water/Clean Air Bond Act of 1996 (1996 Bond Act). Enhancements to the program were enacted on October 7, 2003. Under the Environmental Restoration Program, the State provides grants to municipalities to reimburse up to 90 percent of on-site eligible costs and 100% of off-site eligible costs for site investigation and remediation activities. Once remediated, the property may then be reused for commercial, industrial, residential or public use.

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

HIST SPILLS: SPILLS Database

This database contains records of chemical and petroleum spill incidents. Under State law, petroleum and hazardous chemical spills that can impact the waters of the state must be reported by the spiller (and, in some cases, by anyone who has knowledge of the spills). In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY SPILLS database. Department of Environmental Conservation.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS PART 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration's document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

PFAS 3: PFAS Environmental Site Remediation List

Per- and Polyfluoroalkyl Substances (PFAS) are a group of chemicals used to make fluoropolymer coatings and products that resist heat, oil, stains, grease, and water. Fluoropolymer coatings are blends of resins and lubricants used in products such as water-repellent clothing, furniture, adhesives, paint and varnish, food packaging, heat-resistant non-stick cooking surfaces and insulation of electrical wires. Chemicals in this group include perfluorooctanoic acid (PFOA) and perfluorooctane sulfonic acid (PFOS).

E DESIGNATION: E DESIGNATION SITE LISTING

The (E (Environmental)) designation would ensure that sampling and remediation take place on the subject properties, and would avoid any significant impacts related to hazardous materials at these locations. The (E) designations would require that the fee owner of the sites conduct a testing and sampling protocol, and remediation where appropriate, to the satisfaction of the NYCDEP before the issuance of a building permit by the Department of Buildings pursuant to the provisions of Section 11-15 of the Zoning Resolution (Environmental Requirements). The (E) designations also include a mandatory construction-related health and safety plan which must be approved by NYCDEP.

HSWDS: Hazardous Substance Waste Disposal Site Inventory

The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The last version of the study inventory is frozen in time. The sites on the study will not automatically be made Superfund sites, rather each site will be further evaluated for listing on the Registry. So overtime they will be added to the registry or not.

NYC LEAD 2: Recent Lead Paint Violations

Pursuant to New York City's Housing Maintenance Code, the Department of Housing Preservation and Development (HPD) issues violations against conditions in rental dwelling units that have been verified to violate the New York City Housing Maintenance Code (HMC) or the New York State Multiple Dwelling Law (MDL). Violations are issued when an inspection verifies that a violation of the HMC or MDL exists. It is closed when the violation is corrected, as observed/verified by HPD or as certified by the landlord.

SPDES: State Pollutant Discharge Elimination System

New York State has a state program which has been approved by the United States Environmental Protection Agency for the control of wastewater and stormwater discharges in accordance with the Clean Water Act. Under New York State law the program is known as the State Pollutant Discharge Elimination System (SPDES) and is broader in scope than that required by the Clean Water Act in that it controls point source discharges to groundwaters as well as surface waters.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Day Care Providers

Source: Department of Health

Telephone: 212-676-2444

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Northwest Map:	14115556 PHELPS, NY
Version Date:	2019

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General ENE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>

3605990001B	FEMA Q3 Flood data

<u>Additional Panels in search area:</u>	<u>FEMA Source Type</u>

NO PANEL ID	FEMA Q3 Flood data

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
GENEVA NORTH	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data:*

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Schoharie

Soil Surface Texture: silt loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Moderately well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 53 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	9 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay Soils.	Max: 1.4 Min: 0.42	Max: 8.4 Min: 7.4
2	9 inches	25 inches	silty clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay Soils.	Max: 1.4 Min: 0.42	Max: 8.4 Min: 7.4
3	25 inches	40 inches	silty clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay Soils.	Max: 1.4 Min: 0.42	Max: 8.4 Min: 7.4

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Map ID: 2

Soil Component Name: Odessa

Soil Surface Texture: silt loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Somewhat poorly drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 30 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	11 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 1.4 Min: 0.42	Max: 8.4 Min: 7.4
2	11 inches	29 inches	silty clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 1.4 Min: 0.42	Max: 8.4 Min: 7.4
3	29 inches	40 inches	silty clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 1.4 Min: 0.42	Max: 8.4 Min: 7.4

Soil Map ID: 3

Soil Component Name: Schoharie

Soil Surface Texture: silty clay loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Moderately well drained

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 53 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Freshwater Wetlands

Telephone: 518-402-8961

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Marks Engineering P.C. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EDR BUILDING PERMIT REPORT

About This Report

The EDR Building Permit Report provides a practical and efficient method to search building department records for indications of environmental conditions. Generated via a search of municipal building permit records gathered from more than 1,600 cities nationwide, this report will assist you in meeting the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

Building permit data can be used to identify current and/or former operations and structures/features of environmental concern. The data can provide information on a target property and adjoining properties such as the presence of underground storage tanks, pump islands, sumps, drywells, etc., as well as information regarding water, sewer, natural gas, electrical connection dates, and current/former septic tanks.

ASTM and EPA Requirements

ASTM E 1527-13 lists building department records as a "standard historical source," as detailed in § 8.3.4.7: "Building Department Records - The term building department records means those records of the local government in which the property is located indicating permission of the local government to construct, alter, or demolish improvements on the property." ASTM also states that "Uses in the area surrounding the property shall be identified in the report, but this task is required only to the extent that this information is revealed in the course of researching the property itself."

EPA's Standards and Practices for All Appropriate Inquiries (AAI) states: "§312.24: Reviews of historical sources of information. (a) Historical documents and records must be reviewed for the purposes of achieving the objectives and performance factors of §312.20(e) and (f). Historical documents and records may include, but are not limited to, aerial photographs, fire insurance maps, building department records, chain of title documents, and land use records."

Methodology

EDR has developed the EDR Building Permit Report through our partnership with BuildFax, the nation's largest repository of building department records. BuildFax collects, updates, and manages building department records from local municipal governments. The database now includes 30 million permits, on more than 10 million properties across 1,600 cities in the United States.

The EDR Building Permit Report comprises local municipal building permit records, gathered directly from local jurisdictions, including both target property and adjoining properties. Years of coverage vary by municipality. Data reported includes (where available): date of permit, permit type, permit number, status, valuation, contractor company, contractor name, and description.

Incoming permit data is checked at seven stages in a regimented quality control process, from initial data source interview, to data preparation, through final auditing. To ensure the building department is accurate, each of the seven quality control stages contains, on average, 15 additional quality checks, resulting in a process of approximately 105 quality control "touch points."

For more information about the EDR Building Permit Report, please contact your EDR Account Executive at (800) 352-0050.

EDR Environmental Lien and AUL Search

The EDR Environmental Lien Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.
